REEFRACER

Ready-To-Run R/C Electric Mini Vee

HCAB12**
Length: 15" (380mm)
Beam: 6" (150mm)
Requires: 8 "AA" batteries for the transmitter

Built for fun... and ready-to-run!

Dive right into exciting off-shore action with the super-quick vee-hull Reef Racer! The Reef Racer comes complete and ready to run, with an ABS deck and hull that are pre-painted — there's even a painted driver figure! The Reef Racer offers quick response and "turn-on-a-dime" handling — even at top speeds. And — the Reef Racer's self-righting hull design ensures non-stop action!

- The Reef Racer's amazing maneuverability makes it perfect for small ponds, lakes and swimming pools.
- The included 1100mAh NiMH battery provides long run times, and includes an AC wall charger.
- A pre-built stand is included for display.
- Don't be disappointed by "toy" boats — the Reef Racer is real R/C quality!

Includes a 2-channel pistol grip radio made by Futaba®.

Six different hull colors!

There's no stop in the action with the Reef Racer's unique self-righting design.

PARADISE

Ready-To-Run R/C Sailboat

FIBERGLASS HULL

HCAB01**
Length: 26 in (660mm)
Height: 50.5 in (1283mm)
Beam: 5.25 in (133mm)
Weight: 3 lb (1360g)
Requires: 12 "AA" batteries

Set sail for fun — and leave work behind!

It's the ultimate R/C pleasure cruise! Not only does the Paradise come with a radio system already installed, but even the rigging has been done for you. Factory-finished, the model requires no sanding or painting...and because it's powered by the breeze, you'll need nothing more than a few ordinary "AA" batteries to get your voyage under way.

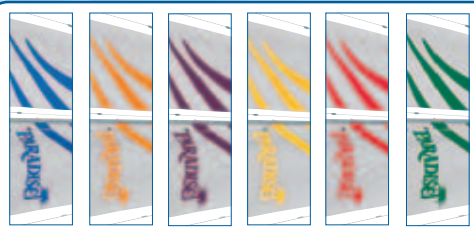

- Assembles quickly — factory-finished, with radio gear and ballast installed.
- Lightweight, strong fiberglass hull arrives beautifully factory-finished.
- Low-drag keel and boom disconnect for easy transporting.
- A unique, elliptically shaped stand is included for secure, attractive model display.

The included 2-channel, 2-stick Aquacraft by Futaba® radio provides rudder and sail control.

Available in six colors!

The boom and mast are made of aluminum. Durable ripstop nylon, printed with bright graphics, forms the sails. Rigging has been completed for you — just match the lines to numbered locations and clip them in place!

PROFISHERMAN™ BASS BOAT

R/C Ready-To-Run
Electric Bass Boat

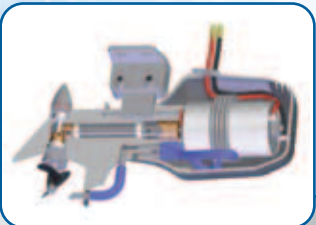

HCAB11**
Length: 26.2 in (665mm)
Beam: 8.8 in (195mm)
Requires: 6-7 cell battery pack, charger and 8 "AA" cells

The easy way to catch your limit — of fun!

With the Pro Fisherman, you can head straight into a relaxing day of R/C on the water. There's nothing to build or finish, and only decals to apply. Its sparkle metallic finish looks great on the water — or on the display stand that looks like a custom tow-behind trailer. It's a catch for beginning boaters and bass-fishing fanatics alike!

- Already assembled and completely equipped. Includes radio, EP outboard motor, reversible ESC and a boat trailer display stand!
- Captures the true bass-boat look, from the trolling motor in the nose to tournament seats on the deck to the sparkle metallic finish on the hull and display stand.
- Decals provide additional detail with ease, including compartment and hatch outlines, cockpit instrument panel, depth finder and more.
- Push-pull steering linkage offers quick, positive response and easy control.

From the shaft down, the EP outboard is all cast-aluminum and stainless steel. Other features include a water-cooled 550 motor, ball-bearing drivetrain and an adjustable transom mount.

The Pro Fisherman's sparkle metallic finish is available in six sun-catching colors!

Looks like it's ready for a quick trip to the lake, but it's actually a realistic stand for static display. Modeled for dock-side authenticity, from the tires underneath to the protective rubber pads on the rails.

Includes a 2-channel pistol grip radio made by Futaba®.

The Pro Fisherman comes complete with swiveling seats, a steering wheel and a foot pedal for the trolling motor in the nose.

HAMMER™

R/C Ready-To-Run Electric Deep Vee

HCAB10**
Length: 24 in (610mm)
Beam: 8.75 in (220mm)
Requires: 6-7 cell battery, charger & 8 "AA" batteries

It's a hit — for fast, easy racing fun!

There's a right tool for every job — and when the job is diving straight into offshore action, the only tool you need is the Hammer RTR. No assembly or finishing is needed, and on-board electronics come already installed. It's an easy way to break into R/C boating... and a rush for experienced skippers, too!

- Radio and drive equipment come already installed — from the rudder servo and reverse-equipped electronic speed control to the water-cooled, 550-size electric motor.
- The waterproof radio compartment features a screw-down cover that allows easy access to the on-board radio gear.
- Realistic deep vee racer looks — complete with twin cockpits.

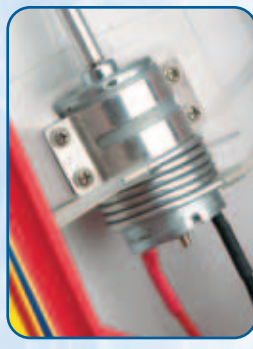

• Done carving into the current for the day? Admire the Hammer at home on its supplied display stand!

Six different hull colors!

The Hammer's factory-installed, 550-size electric motor is equipped with a water-cooled jacket that helps avoid overheating even at maximum speeds.

Includes a 2-channel pistol grip radio made by Futaba®.

NITRO HAMMER™

R/C Ready-To-Run Nitro Deep Vee

HCAB26**
Length: 24 in (610mm)
Beam: 8.75 in (220mm)
Requires: 20% glow fuel, glow starter and 12 "AA" batteries

Strike hard, strike fast!

Finishing, building, assembling gear and adding hop-ups — they all take time. But getting the Nitro Hammer RTR in the water takes almost no time at all! Almost everything required is included — and nearly everything that's included is either installed or assembled. Plus, the Nitro Hammer also includes a boat stand and a DVD that shows how to break-in and maintain the included engine.

- The fuelproof fiberglass hull and deck are prejoined, factory-finished treated to a high-quality gelcoat to further protect the hull — and keep the colors bright!
- The AquaCraft .15 Marine engine includes a tuned pipe for even more high powered racing performance.
- The long rudder cuts deep for razor-sharp turns. The trim tab/turn fins on either side can be adjusted to ensure smooth, straight running!
- The included stand can be used for display, or as a handy aid for routine maintenance.

The 2-channel pistol grip radio is made by Futaba®.

The Nitro Hammer's recoil-started Marine .15 comes factory-equipped with a tuned pipe. Other features include: true ABC construction, dual bearings and a two-needle rotary carb. A glow plug, manifold and engine break-in DVD are also provided!

Six different hull colors!

FIBERGLASS HULL

ATLANTIC

HARBOR TUGBOAT

R/C Ready-To-Run
Electric Tugboat

HCAB59**
Length: 30.25 in (770mm)
Beam: 9.75 in (250mm)
Height: 19 in (485mm)
Requires: 6-7 cell 7.2V
NiCad or NiMH battery,
10 "AA" alkaline batteries,
charger

FIBERGLASS
HULL

Authentically detailed — generously equipped!

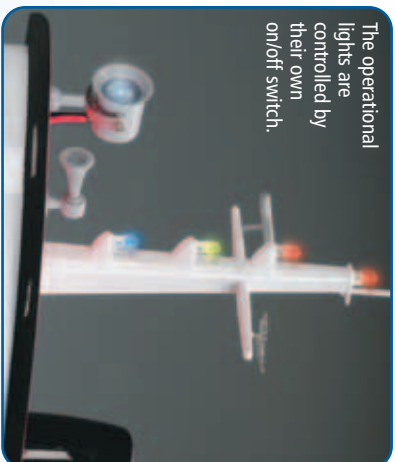

It's so realistic that you almost expect to see smoke streaming from the stack and hear the massive engines churning the props. From the rubber bumper on the hull to the tow loop on the stern, the Atlantic Harbor Tugboat features extraordinary detailing that is normally found only on a kit you've built yourself. But this tugboat is completely factory-assembled, and can be on the job just moments after you take it out of the box!

- Already assembled and completely equipped! Includes radio, motor, reversible ESC, running lights and display stand.
- Rich in real-life details! Includes working lights on the cabin and mast, twin anchors in the bow and real rubber fenders over the rails.
- The strong fiberglass hull offers a glossy factory finish on the outside and factory-installed running gear inside.
- The powerful 550 motor and direct drive system provide scale-like speed and power.
- Looks as good in the water as it does on its custom wood display stand!

The painted cabin serves as an easy-access hatch to all on-board gear.

The operational lights are controlled by their own on/off switch.

A lifeboat with working davit is mounted behind the cabin.

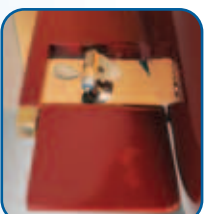

Rubber tires and foam fenders are already lashed in place.

Includes a 2-channel pistol grip radio made by Futaba®.

Maneuver easily by controlling the large rudder from your transmitter.

The electronics for radio-control operation are already installed.

Details on the deck include tow bars and anchor winches, as well as numerous bits for securing tow lines.

BRISTOL BAY

R/C Ready-To-Run Electric Fishing Boat

HCAB60**
Length: 33.5 in (851mm)
Beam: 8.75 in (222mm)
Height: 29 in (737mm)
Requires: 6-cell, 7.2V battery, charger, 8 "AA" batteries for the transmitter, 2 "AA" batteries for the boat lights

FIBERGLASS
HULL

The catch of the day!

From the cloth sails to the wood deck, the Bristol Bay captures the look and feel of an authentic working fishing vessel. But for all the scale details that this boat has, there's very little to do when you take it out of the box. And if you think this model looks great on display, wait until you see it in action at your local boat pond!

- No building required — just install the mast and connect the pre-numbered rigging lines.
- Features authentic scale details that are pre-assembled and pre-painted — plus working lights!
- A 2-channel radio, 550-size motor and electronic speed control with forward and reverse are already installed.
- The impressive quality is illustrated by the strong, lightweight, pre-painted fiberglass hull with wood deck.

The operational lights are controlled by their own on/off switch.

Includes an AquaCraft 2-channel pistol grip radio made by Futaba®.

The wood deck simulates the planking found on full-size fishing vessels.

The static sails are made of cloth.

Coiled rope on the sail winch drums add to the model's authenticity.

Horns, life preservers and railing are among the many scale touches. A working searchlight is included.

The electronics for radio-control operation are already installed.

Anchors are pre-mounted off the bow.

AQUACRAFT

AIR FORCE

Ready-To-Run R/C Nitro Airboat

HCB27**

Length: 36 in (915mm)

Beam: 13.5 in (345mm)

Requires: glow starter, engine starter, fuel & 12 "AA" batteries

Ready to rule the waves!

The Air Force RTR is powered by air, fueled by fun...and ready to run! Almost everything you need is included — even the throttle linkage is in place. All that remains is attaching the fully assembled engine pod to the deck. Install radio batteries, fuel the tank, fire up the engine — and the Air Force is ready to take off!

- It's an easy, affordable "first float" for new modelers — and a convenient change of pace for pilots and drivers!
- A quality gel-coat finish on the fiberglass hull and deck protects it against wind, water and fuel.
- All necessary hardware is supplied — made of stainless steel to resist rust and corrosion.
- Includes a display stand that doubles as a carrying tote.

The included AquaCraft 2-channel pistol grip radio is made by Futaba®.

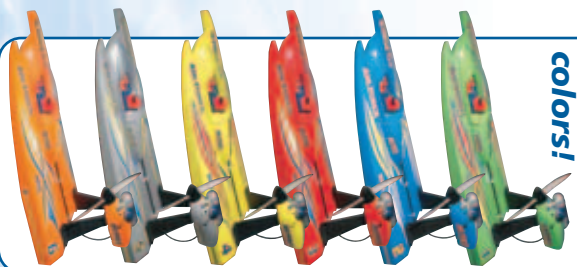

The Air Force's Pro .46 engine delivers surprising speed and power. Features include: dual bearings, ABC construction, a tuned muffler and an engine break-in video.

**FIBERGLASS
HULL**

Choose from six exciting colors!

The ARR version of the AquaCraft Air Force features a gel-coated, white fiberglass hull. It requires a .46-size engine and 2-channel radio system in addition to all RTR requirements.
