**Height:** 14 in (355 mm)

**Weight:** 6.3 lb (2.86 kg)

**Requires:** 10-15% nitro aircraft fuel & 8 "AA" batteries

## Romp through the swamp!

With all of its realistic details, the Alligator Tours would look right at home in the Florida Everglades. It also handles like full-size airboats do. But maybe the best thing of all about the Alligator Tours is that it comes ready-to-run across water, lily pads, marshes, wetlands and more. Plus, it's so easy to run and maintain that even a first-time modeler can have it out of the box and on the water in next to no time!

- Arrives assembled and painted, with radio gear, engine and prop already installed.
- Runs well on 10-15% airplane fuel — no need for high-nitro fuels or special glow plugs.
- A SuperTigre .27 engine and APC™ 9x6 pusher prop provide the thrust for amazing speed and powerful turns.
- Dual fiberglass air vanes provide simple, effective steering on water, ice or wet grass.
- Welded cage adds authentic looks and additional safety for fingers, engine and prop.
- Molded strakes keep the Alligator Tours running straight and true, even at top speed, while the flat-bottomed hull allows you to power-slide over the waves.
- An elevated 180 cc (6.1 fl. oz.) fuel tank provides good fuel flow and a flip top for fast refueling.
- Included stand doubles as a handy carrier and simple display.

### The Alligator Tours Airboat includes:

- A finished, ready-to-run fiberglass hull with factory-installed foam flotation, prop cage, air rudders and water-resistant radio box
- Tactic TTX300 3-channel 2.4GHz SLT radio, TR325 receiver and TSX200 servos
- Air-cooled SuperTigre® .27 engine with muffler and setup DVD
- Display stand/carrier
- 9x6 pusher prop
