

# MINIMONO

Ready-To-Run Brushless 2.4GHz Boat

## Mini size...max performance!

The Minimono represents a new breed of boat: a mini-sized model equipped with a brushless motor and an ESC that uses a LiPo battery! This advanced power system makes the Minimono one fast boat that's lots of fun to drive. Its smaller size and responsive handling let you race on smaller bodies of water, and it's very affordable to operate too!

- **Water-cooled 28-30-2200kV brushless motor**
- **20A ESC with Deans® Ultra Plug® connector**
- **Tactic™ 2.4GHz radio system with interference-free control, no-crystal convenience and Secure Link Technology™**
- **A breakaway rudder swings back to avoid damage upon impact with an object in the water**

Deans® and Ultra Plug® are registered trademarks of W.S. Deans Co. U.S. Patent No. 5,533,915

### AQUB1805

**HULL LENGTH:** 16 in (497 mm)

**OVERALL LENGTH:** 18 in (458 mm)

**WIDTH:** 5.5 in (140 mm)

**HEIGHT:** 3.25 in (83 mm)

**WEIGHT** (less battery): 10 oz (283.5 g)

**MOTOR:** AquaCraft water-cooled 28-30-2200kV brushless outrunner motor (included)

**RADIO:** Tactic™ TTX240 2.4GHz spread spectrum radio system (included)
