

MINIMONO

AQUB1806

HULL LENGTH: 16 in (406 mm)

BEAM: 5.5 in (140 mm)

WEIGHT: 10 oz (284 g)

REQUIRES: (4) "AA" batteries, 11.1V 1000-1600mAh LiPo battery with Star Plug or Deans® Ultra Plug® connector and LiPo charger

Ready-To-Run Brushless Monohull

Mini size...max performance!

The Minimono is one of the new breed of boats: mini-sized, with a brushless motor and an ESC that can handle 3S LiPo power! Combined, they make the Minimono lightning fast and lots of fun to drive. Its small size and responsive handling let you race on small bodies of water. The affordable price makes it possible to enjoy brushless power and speed on a modest budget.

- **Sleek, tough ABS hull with factory-installed foam flotation, wedge breakaway rudder and trim plate/turn fin set.**
- **Tactic TTX300 3-channel 2.4GHz SLT radio with TR325 receiver and mini steering servo.**
- **Water-cooled 28-30-2200kV outrunner brushless motor with transom-mounted water pickup and bullet motor connectors.**
- **30A brushed/brushless ESC with stutter-bump warning, low-voltage cut-off* and Star Plug battery, bullet motor and universal radio connectors.**
- **Wire Drive with standard 1/8" (0.125 in) prop shaft and 30 mm fiberglass prop.**
- **Display/work stand.**

* For LiPos only
