

Ready-to-Run Brushless 2.4GHz Catamaran

The new wave knockout!

This isn't your typical catamaran. For proof, just let the Wildcat EP loose and watch it fly! You'll find the 1800kV outrunner brushless motor delivers speed and efficiency. There's also a water-cooled, LiPo-compatible 50A brushless controller with low-voltage cutoff, a stutter bump and Deans Ultra Plug connector. A Tactic 2.4GHz radio system provides first-class control, and a "break-away" rudder system swings back upon impact to prevent damage to the hull.
