

UL-1 SUPERIOR™

Capable of
65+ mph speeds!

The racing RTR with all the extras — and no equals!

Until the UL-1 Superior, there had never been a LiPo-ready hydro that included both brushless power and 2.4GHz dependability. The UL-1 Superior was designed in the U.S.A. to deliver today's best in cutting-edge control and competition-quality performance and features. That includes a hand laid-up fiberglass hull optimized for racing and brushless power by Mike "Grimracer" Zaborowski, winner of multiple national titles!

- Painted, fiberglass hull with center tub for electronics and breakaway fins.
- Tactic TTX300 3-channel 2.4GHz SLT radio system with:
 - Tactic TR325 3-channel SLT receiver
 - Tactic TSX200 servo
- AquaCraft 6-pole 36-56-2030kV marine motor with:
 - Aluminum water-cooling jacket and installed 4 mm gold-plated bullet connectors
 - Waterproof, water-cooled 60A controller with stutter-bump warning, low-voltage cut-off* and Star Plug battery, 4 mm bullet motor and universal radio connectors
- Efficient 0.150" flex cable drive
- High-performance GrimRacer hardware
- 3-bladed 40 mm FRP prop
- Display/work stand

* with LiPo use only
