

ALLIGATOR TOURS™

Ready-to-Run Nitro Airboat

TAKE A ROMP THROUGH THE SWAMP!

It looks and handles just like a full-size “Everglades” airboat and arrives ready for action right out of the box. A SuperTigre® .27 airboat engine and prop provide the power to send it skimming over lily pads or wet grass at high speeds. And with the huge vanes on the air rudder, you can power-slide through a course change in an instant...or do donuts on a lake. Best of all, the Alligator Tours airboat is so easy to run and maintain that even first-timers can enjoy it!

- Arrives assembled and painted, with the radio, engine and prop already installed.
- Runs well on 10-15% airplane fuel — no need for high-nitro fuels or special glow plugs.
- Features strakes on the flat, fiberglass hull to keep you running true and in control even at top speed.
- Detailed driver and passenger seats add a realistic touch
- Welded cage adds authentic looks, and provides additional safety for fingers, engine and prop.
- Included stand can be used for maintenance or display and doubles as a handy tote.
- Flip-top fuel tank is elevated to ensure proper flow to the engine.
- Includes watertight radio box, APC 9x6 prop, SuperTigre .27 engine and Tactic™ TTX205 2-channel radio.
