

TODAY'S BEST IN FAST, EASY R/C FLYING!

Sky
RANGER
Ready-to-Fly Electric R/C Trainer

FastEasyFlying!

With the Cox Sky Ranger, "Easy does it" says it all. You can have it in the air in 5 minutes — and once it's there, the Sky Ranger makes picking up the basics as easy as A-B-C. FlightFlex™ construction and the exclusive SafeProp™ protection system make it virtually unbreakable — and it's so complete that there's nothing else you need to buy!

- Durable FlightFlex foam parts bend on impact to absorb crash energy and protect onboard electronics!
- SafeProp's breakaway design helps protect against breaking the prop and/or bending the motor shaft — even during a hard, nose-first crash!
- No finishing or painting required. Plug-in landing gear and a bolt-on wing speed final assembly.
- A 2.4GHz radio system offers interference-free flying, whether you're alone at the park or in a crowd at the field! Controls can be set up for new pilots or experienced pros, just by pushing down on the sticks!
- LiPo flight battery provides up to 10 minutes of flying time per pack.

Specifications:

Wingspan: 20 in (510 mm)

Weight: 2.2 oz (62 g)

Length: 15.5 in (395 mm)
