

COX: TODAY'S BEST IN FAST, EASY R/C FLYING!

FastEasyFlying!

EXTRA 300
Ready-to-Fly Electric R/C Aerobat

If you have 5 minutes, you have everything you need to enjoy aerobatics with the Extra 300. Everything else is in the box, from the screwdriver to attach the wing to a cutting-edge 2.4GHz radio system. And since it features FlightFlex™ construction and the exclusive SafeProp™ protection system, it's not only incredibly complete — it's virtually unbreakable!

- Durable FlightFlex foam parts bend on impact to absorb crash energy and protect onboard electronics!
- SafeProp breakaway design helps protect against breaking the prop and/or bending the motor shaft — even during a hard, nose-first crash!
- No finishing or painting required. Plug-in landing gear and a bolt-on wing speed final assembly.
- A 2.4GHz radio system offers interference-free flying, whether you're alone at the park or in a crowd at the field! Controls can be set up for new pilots or experienced pros, just by pushing down on the sticks!
- A lightweight LiPo flight battery provides up to 10 minutes of flying time per charge.

Exclusive SafeProp™ Protection System

The Cox SafeProp not only pops off to prevent damage — it can be popped right back on, so you can be back in the air in seconds!

The Extra 300 includes all this:

- The assembled Extra 300 with installed motor, receiver/speed control and servos
- 2.4GHz radio system
- 7.4V 250mAh LiPo battery
- Balancing LiPo charger
- AC power supply
- Spare propeller
- Instructions
- Screwdriver
