

COX: TODAY'S BEST IN FAST, EASY R/C FLYING!

SKYCRUISER™

Ready-to-Fly Electric R/C Glider

FastEasyFlying!™

Eager to start flying? The Sky Cruiser can help. Assembly takes less than 5 minutes. And there's nothing to buy, because everything you need is already in the box. The cutting-edge 2.4GHz radio system comes with batteries, and features dual rates to make learning easier. Charge up the LiPo flight pack, and you're ready for up to 10 minutes of flight excitement. And don't worry if you crash: FlightFlex™ construction and the exclusive SafeProp™ system make the Sky Cruiser virtually unbreakable!

- Durable FlightFlex foam parts bend on impact to absorb crash energy and protect onboard electronics!
- SafeProp breakaway design helps protect against breaking the prop and/or bending the motor shaft — even during a hard, nose-first crash!
- No finishing or painting required. The wing halves simply slide together on a composite rod. Assembly takes just 5 minutes or *less!*
- A 2.4GHz radio system offers interference-free flying, whether you're alone or flying with friends. Controls can be set up for new pilots or experienced pros, just by pushing down on the sticks!
- A lightweight LiPo flight battery provides up to 10 minutes of flying time per charge.

The Sky Cruiser includes all this:

- The assembled Sky Cruiser with installed motor, receiver/speed control and servos
- 2.4GHz radio system
- 7.4V 250mAh LiPo battery
- Balancing LiPo charger
- AC power supply
- Spare propeller
- Instructions
- Screwdriver

Exclusive SafeProp™ Protection System

The Cox SafeProp not only pops off to prevent damage — it can be popped right back on, so you can be back in the air in seconds!

Specifications:

Wingspan: 27.6 in (702 mm)

Weight: 3.3 oz (94 g)

Length: 20.2 in (515 mm)

Stock Number: COXA6503
