

DROMIDA

VOYAGER™

Ready-to-Fly Electric-Powered Airplane

DIDA0200

Wingspan: 19.5 in (495 mm)

Weight: 1.9 oz (54 g)

Length: 15 in (381 mm)

Requires: Nothing!

Flying made easy. REALLY easy.

R/C flying success — and the fun that goes with it — starts with choosing the right first plane. The Voyager is ideal for beginners, because it exhibits slow, docile flight characteristics and comes preassembled with everything included. The 4-channel radio delivers positive rudder, elevator and throttle control. Details such as wheel pants and panel lines add more scale realism than typical trainers. And with the Voyager you can learn to fly outdoors in calm conditions, and then take advantage of its compact size to fly inside a large indoor gymnasium as well.

- Easy to fly with little or no experience
- 100% Ready to Fly, with everything included
- Rudder, elevator and throttle control
- Scale details such as wing rib detail, wheel pants and panel lines

Features:

- Fully assembled aircraft
- 4-channel SLT compatible transmitter w/built-in LiPo charger
- Rechargeable 3.7V 1S LiPo battery
- (4) "AA" batteries
