

KODO™

105mm Micro Quad with Camera

Only
\$59.99*

DIDE0005
Diagonal: 105 mm (4.1 in)
Weight: 52 g (1.8 oz)
Requires: nothing!

Why pay more for a camera-equipped quad, when you can get the KODO – a complete, ready-to-fly, camera-equipped quad -- for just \$59.99? Send it up, and you can shoot crisp, clear photos and videos, make it flip at the touch of a button and fly it indoors as well as out. No previous flying experience required. It's an easy "fly" for first-time pilots, yet built tough to take new pilot "oops!" in stride and come back for more.

- Shoots 1280x960 jpeg files and 780x480 .avi files
- Stays level, right-side up and easy to fly with the help of a three-axis gyro and three accelerometers.
- Includes a 2.4GHz radio with Easy, Normal and Expert flight modes. You can learn on Easy and progress to Normal – or go straight to Expert for maximum flying freedom.
- Features separate controls for still photos and videos, plus a 2GB memory card and card reader.
- High-intensity LEDs make tracking easy during the day and even easier at night!
- Recharges from any handy USB port.
