

KODO™ HD

Ready-to-Fly 106 mm Camera Drone

DIDE0006

Diagonal: 106 mm (4.17 in)

Weight: 40 g (1.4 oz)

Requires: nothing!

New 1080p camera for better, sharper pictures and videos.

The digital camera in the KODO HD offers you more than high-definition resolution; it gives you *full* high-definition 1080p resolution to work with, so you can shoot videos and pictures of unprecedented sharpness and clarity. You can set camera angle on the ground, so you can get just the shot you want in the air.

And that's just the start of what the KODO HD can offer. It's also lighter than the original, for longer flights, faster response and more aerobatic performance. And since it's also fully equipped and factory-assembled, you can be in the air and enjoying your first flight as soon as you charge the battery!

- Shoots 1080p jpegs and .avi video @ 30fps.
- Camera angle can be adjusted manually on the ground, so you can get just the shot you want in the air!
- Weighs 12 grams (25%) less and flies 20% longer than the original KODO.
- Superior lightness offers faster, stronger response.
- Features a sleek, tough body shell for better appearance and protection, plus installed blade guards to prevent against prop damage.
- Fail-safe prevents motors from starting until the radio is turned on.

Shoots videos and still photos

Tough

Built to survive first flights

2.4 GHz Radio

Reliable 2.4GHz control

Auto Flip

Flips with push-button ease
