

DLE-120 TWIN GASOLINE ENGINE

MAXIMUM POWER AT MINIMUM WEIGHT

*Includes mufflers,
electronic ignition
and more!*

DLEG0120

Displacement: 120.0 cc (7.4 cu in)

Bore: 1.85 in (47 mm)

Stroke: 1.38 in (35 mm)

Total Weight: 6.38 lb (2.89 kg)

Output: 12 hp @ 7500 rpm

Includes: Electronic ignition module, mufflers, spark plugs, mount, standoffs, spiral wire wrap & connector safety clips

Requires: unleaded gasoline, 2-cycle oil, ignition battery & propeller

Suggested Propellers: 26x10, 26x12, 27x10, 28x10

R/C's best buy in gas power!

The DLE-120 delivers 50 pounds of static thrust—more than enough power for intense 3D maneuvers. Twin opposed cylinders reduce vibration and engine wear and increase performance. It's all packed into a magnesium alloy crankcase that is strong and light.

Mufflers, standoffs and electronic ignition boost performance even further. The DLE-120 delivers the most punch at the lowest weight and the lowest price of any engine in its class. What more do you need to know?

Suggested Propellers: 26x10, 26x12, 27x10, 28x10
