

1/10 Scale and 1/8 Scale Brushless Systems

BRUSHLESS IS THE WAY TO GO — AND ONYX IS THE WAY TO GO BRUSHLESS!

Onyx Brushless Systems are perfect for upgrading existing RTR brushless systems, as well as installation in 1/10 and 1/8 scale electric kits. Systems are available in popular kV ratings, making them ideal for both buggies and trucks. The ESC is fully programmable, for easy tuning to specific driving styles. It's also waterproof for worry-free driving. The optional hand-held Programming Card simplifies programming and allows for quick parameter adjustments.

1/10 Scale

- DTXC3164 Onyx 1/10 Scale Brushless System 3930kV
- DTXC3165 Onyx 1/10 Scale Brushless System 4420kV
- DTXC3166 Onyx 1/10 Scale Brushless System 5900kV
- DTXC3172 Onyx 1/10 Scale Brushless SC System 3650kV
- DTXC3174 Onyx 1/10 Scale Brushless SC System 4550kV

1/8 Scale

- DTXC3194 Onyx 1/8 Scale Brushless System 2200kV
- DTXC3195 Onyx 1/8 Scale Brushless System 2650kV

Programming Card

- DTXC1352 Onyx ESC Programming Card

- *Waterproofed for protection from the elements*
- *Pre-installed bullet connectors for quick and easy installation*
- *No soldering required*
- *Choose from five different kV ratings for 1/10 vehicles, including two with 4-pole motors designed specifically for short course trucks*
- *Systems for 1/8 scale vehicles are available in two popular kV ratings*
- *Using the optional Onyx Programming Card you can change settings for any of the Onyx Brushless Systems with just one button*
