

EVADERTM BRUSHLESS

GET DIRTY!TM

Ready-to-Run 1/10 Scale 2WD EP Stadium Truck Non-stop, high-speed action!

The radio system is a 2.4GHz system made by Futaba, and the receiver is compatible with Futaba FHSS surface systems. The power system boasts a brushless ESC and motor, for blistering speeds and hotter action than ever before.

And those are just a few of the highlights, because this Evader also includes waterproof electronics, full ball bearings and a factory-installed wheelie bar. It's ready for action right out of the box, but it's also compatible with virtually all Evader hop-ups!

DTXD37**

Length: 18.5 in (470 mm)

Width: 12.8 in (325 mm)

Height: 6.1 in (155 mm)

Weight: 3.6 lb (1633 g)
