

# 835E

READY-TO-RUN  
1/8 SCALE BRUSHLESS  
4WD RACING BUGGY

## TRUE 1/8 SCALE SIZE — UNDENIABLE 1/8 SCALE POWER.

With the 835E, the going-in price is a pleasant surprise...and what you get for the money is even more so. It starts off with a true 1/8 scale-size *brushless* power system. There's an Onyx 2200kV motor matched to an Onyx 120A waterproof ESC — a power pair that can deliver serious air time off berms, explosive hole shots and wild, wailing top end.

And it gets even better, because the 835E is *loaded* with extras you'll like. Tuning options that are usually add-ons. A 2.4GHz transmitter. Hardened steel and anodized aluminum parts — and the protection of the only free, 1-year parts replacement guarantee in all of R/C.
