PEAKS AND DISPLAYS RACING DATA WITH PUSH BUTTON EASE!

The Onyx 210 is a hybrid: a peak charger that offers the performance data that serious competitors need with the convenience that sport racers prefer. Push buttons make it simple to set up, start charge or pull up pack data. Peak detection and auto-trickle make getting — and maintaining — a full charge a given in the pits or on the workbench. A blue backlit LCD makes it easy to see and record seven critical charging metrics even under the most adverse lighting conditions.

DTXP4210

Input: 110V 60Hz AC/11-15V DC

Battery types: 4-8 NiCd or NiMH cells

Battery capacity: 750-7500mAh

Fast charge current: 0.8A, 1.0A, 3.0A & 5.0A (40W max)

Fast charge termination: peak detection

Input connections: AC lead w/plug; DC lead w/alligator clips

Peak sensitivity: 8mV (NiCds)/4mV (NiMH)

Auto-trickle current: 1/20 fast charge setting

Output connection: lead w/standard connector; universal jack for charging 4-8 cell Rx packs

Setup: 3 push buttons

Display: 7-segment, blue backlit LCD

Data Displayed: cell chemistry; output and peak voltage; charge current, capacity and time; alerts

Dimensions: 5.7 x 5.2 x 1.8 in (146 x 133 x 46 mm). Need to cx on web page & chart.

Weight: 19.2 oz. (543 g)

Safety/Protection: solid-state reverse polarity and current overload circuitry; 90-minute safety timer & audible alerts

For complete specifications, visit the Onyx 210 web page on Duratrax.com

- *Big characters and a blue backlit LCD makes data stand out sharp and clear for easy reference inside or outside, day or night.*
- *Data button changes data displayed as quickly as you can push it.*
- *Includes auto-trickle and a safety timer to ensure a full charge without any danger of overcharging.*
- *Sets up with push buttons — and uses audible signals to confirm settings and sound alerts.*
- *Features a lead and plug for AC use, plus alligator clips and a built-in AC power supply for DC power use.*
- *Compact, lightweight and protected by the Duratrax 5-year limited warranty.*
