Built with proven technology— enhanced by balancing!

There are a lot of chargers out there. But there are few that offer modelers as much for as little as the Onyx 235.

There's peak charging for nickel-based packs… balanced charging for lithium packs…three output adapters…two balancing boards for 2S-6S packs… even a USB jack for charging personal electronics and a mini USB jack for downloading firmware updates. Versatile and value-packed: two great reasons to buy an Onyx 235.

The AMA Advisory on LiPo Safety

- Balances up to 4 lithium cells with +/- 5mV accuracy — and extends the life of the pack!
- Charges all packs at up to 8A — and lithium packs at up to 4C.
- Includes Star Plug*, standard and Traxxas® output adapters, plus JST XH and Thunder Power 6S balancing boards.
- Detachable AC and DC cords reduce clutter, but leave power options open.
- Features dedicated jacks for added versatility:
  - Universal radio (for charging radio packs)
  - Balancing
  - USB (for charging cell phones and other electronics)
  - Mini USB (for downloading firmware updates)
- Features push buttons and audible cues for simple setup — and 10 battery memories for instant recall and customized results.
- Reversed, backlit LCD confirms settings and displays 7 types of charge data, including individual cell voltages during balancing.
