

protoX FPV

Micro HD First-Person-View Quadcopter

View your quadcopter's flight in real time!

The Proto-X FPV is durable, stable and easy to fly. It puts you in the pilot's seat by streaming HD video to the transmitter's 4.5" screen and lets you save your in-flight videos to the included memory card for later review. It's easy to fly indoors or out, gyro stabilized, and comes with an interference-free 2.4GHz radio with a hood for easy outdoor viewing. It comes complete with a LiPo battery, USB charge cord, and everything else you need to fly, film, and have fun! Just install four "AA" batteries and you're good to go.

Includes:

- Quadcopter
- 2.4GHz radio with 4.5" hooded viewing screen
- Micro memory card and reader
- USB charge cord
- 650mAh 1S LiPo battery
- (4) spare rotor blades
- Blade changing wrench
