Diagonal Measurement: 170 mm (6.69 in)
Weight (with battery): 235 g (8.25 oz)
Requires: Elanview app, micro memory card & mobile device for Android or iOS

So much fun, for so little.

Only Hobbico has the Cicada—and the Cicada is the only drone that offers so much potential in such a compact affordable package. You can fly it with your smartphone or tablet, and fly it the way you want: slow, medium or fast, for up to 15 minutes at a time. You have 3 ways to control it: with virtual sticks, keypads or a gravity sensor. You can fly indoors with ease, fly outdoors with GPS guidance, take off or power down with simple slide buttons and return home with the push of a button.

Onscreen displays keep you alert to the status of battery voltage and GPS and Wi-Fi signals. Wi-Fi and a micro memory card port give you the option to store videos and photos onboard, or stream them directly to the web.

The Cicada includes:

- Fully assembled drone airframe with brushless motors, lightweight ABS shell, 3-axis gyro, sensor & onboard barometer & GPS functions
- Wi-Fi enabled, HD digital 1080p video/16 MP still/10 MP burst photo camera with 169° fisheye/F2.8 lens, adjustable camera angle & EIS (Electronic Image Stabilizing) system
- Foam-padded camera cradle with anti-vibration rubber grommets
- (2) 7.4V 1000mAh rechargeable LiPo batteries, plus cradle & charger
- (4) spare propellers
- Screwdriver
