

tidewater™

Captain a seaplane

Make the Tidewater your first — or next — float plane! Fast to assemble without using glue, it boosts your confidence with predictable flight characteristics and smooth water handling. The brushless power system provides plenty of muscle for easy takeoffs and exciting sport aerobatics. Choose the RTF version for all-you-need convenience...or opt for the Tx-R Prime to use your own favorite transmitter, battery and charger.

- Durable, factory-built AeroCell airframe screws together for fast, easy assembly without gluing.
- Specially contoured fuselage, water rudder, and plug-in floats provide excellent handling while taxiing on water.
- Both versions include a powerful brushless motor and ESC, four micro servos, and an SLT receiver compatible with AnyLink.
