## Fast forward into flight!

With the futuristic Erazze, you can finish assembly in under 60 seconds. All you do is snap the magnetic tail fin in place. Install your flight pack, and you're ready for takeoff. Finger holes in the AeroCell foam fuselage provide a good grip for hand launches — and once you hit the throttle, the brushless power system accelerates you to full throttle fun in a heartbeat. See what the future of flight holds with the Erazze!
