

AIRCORE™

Modular aircraft system

Me 109

When the full-size Me 109 was introduced in 1937, it was the first of the modern fighter planes. This Flyzone version combines superior detail with AirCore convenience. Like all AirCore aircraft, the Me 109 is Power Core Ready – the Power Core installs and aligns with magnets so you can be airborne in an instant! Just drop in the Power Core, which holds all the control and power components, and get in the air!

FLZA3906

Wingspan: 22 in (560 mm)

Length: 20 in (510 mm)

Weight: 4.0 oz (113 g)

Requires: AirCore Power Core, 4-channel SLT transmitter *or* AnyLink2 and compatible 4-channel transmitter, 7.4V 250mAh LiPo battery and compatible charger

PCR™
POWER CORE READY
