

DHC-2 Beaver

start your adventure here

From land or from the lake

It was one of the most utilitarian aircraft ever produced, and Flyzone has brought back the deHavilland DHC-2 Beaver as a Select Scale model that'll have you exploring the great outdoors in just minutes! Included floats with water rudders let you use a pond or small lake for takeoffs and landings; fixed landing gear is also supplied. Final assembly is quick and easy, with no gluing, and AeroCell foam construction offers plenty of surface detail complemented by working LED lights, a replica radial engine and more. Choose the RTF for its all-in-one convenience, or fly the Tx-R Prime with a 5-channel SLT transmitter, or your favorite transmitter and the AnyLink2.
