F4U CORSAIR
outmaneuver the enemy

Flyzone makes it easy to fly the famous bent-wing fighter — AND includes exciting features, such as LED navigation lights and retracts, that most other Corsair models don't include. Choose the RTF for all-in-one convenience, or use your favorite transmitter with AnyLink to pilot the Tx-R. At a park or local club site, you'll win raves flying the Select Scale Corsair!

- Molded, factory-painted AeroCell foam sections assemble quickly, without glue.
- Both versions include brushless power system, five micro servos, and an SLT receiver compatible with AnyLink.
- Loaded with scale details — molded-in panel lines, pilot figure, replica radial engine, operating navigation lights and rotating retracts with gear doors.
