

4PL

4-Channel 2.4GHz Computer System

4PL: A bargain for bashers!

Tough. Built with Futaba dependability. Loaded with features for cars, truck and boats, yet amazingly affordable — *that's* what the 4PL is. It's everything a basher could want — and that's why BigSquidRC.com made it the first radio system ever to win their coveted Basher Seal of Approval. The 4PL is FHSS/S-FHSS selectable, which allows you to take advantage of the higher frame rates possible with the included R2104GF receiver. And with the R2104GF, you also enjoy high-voltage design for more power options, and the simplicity and speed of Easy-Link binding. See how much versatility and value you can pack into one radio with the versatile Futaba 4PL.

4PL Overview

- 1 programmable mix
- Dual ESC/4WS/Brake mixing
- 40-model memory
- 10-character model naming
- Model select, copy & reset
- Model/receiver type/servo response mode
- Assignable functions (switches & dials)
- FHSS/S-FHSS compatible
- Adjustable anti-lock braking (ABS)
- Up/down/lap timer w/100-lap memory
- Digital trims with step select
- Adjustable steering & throttle tension
- Adjustable trigger position
- 50/50 or 70/30 throttle modes
- MC-Link
- Backlit LCD with adjustable contrast & power-off alarm
- Servo operation display
- Fail-safe and battery fail-safe
- Fail-safe on all channels (S-FHSS mode only)
- Low-battery and power-off alarms
- Alarm tone adjustment
- Charge jack

Functions

- Reverse, endpoint adjustment & sub trim (Ch. 1-4)
- Digital trims, trim rate, exponential, speed & delay (Ch. 1 & 2)
- ABS (Ch. 1, 3 & 4)
- Brake & channel position (Ch. 3 & 4)
- Electronic and mechanical ATL, idle-up, acceleration, throttle hold & servo neutral select (Ch. 1)
- Dual rates & speed return (Ch 2)

Includes: 4PL transmitter, R2103GF receiver & instruction manual.

Requires: (4) "AA" alkaline batteries.
