

# JU-87 STUKA

Almost Ready-to-Fly .61-.91 Warbird

## STORM TROOPER OF THE SKIES!

Pilot figure not included

**ACT NOW, WHILE  
THE LIMITED  
PRODUCTION RUN  
LASTS!**

It was the very first ARF version of this dive bomber ever created for glow power and R/C. Great Planes is making it available again...but only for as long as the quantities from a limited production run. And once they're gone, the Stuka may be gone forever. Don't miss your chance to own an authentic, easy-building replica of the most iconic Luftwaffe bomber of all time: the Ju-87 Stuka!

- Captures the original's forbidding looks in scale, from the "greenhouse" canopy to the underslung ailerons and flaps on the gull wing!
- Streamlines assembly with fully sheeted wing and fuselage sections covered in a flat-finish camouflage trim scheme.
- Includes decals to reproduce authentic markings and insignia and painted fiberglass parts for the cowl and wheel pants.
- Performs well on either a 2-stroke .60 or 4-stroke .91 — and tracks to perfection with both!
- Features an aileron servo in each wing — and can be built with optional flaps for faster "fighter-style" takeoffs and slower, more controllable landings.

### GPMA1340

Wingspan: 70 in (1780 mm)

Wing Area: 770 in<sup>2</sup> (49.6 dm<sup>2</sup>)

Weight: 8 lb (3630 g)

Wing Loading: 24 oz/ft<sup>2</sup> (73 g/dm<sup>2</sup>)

Length: 55 in (1400 mm)

Requires: radio with a minimum of 4 channels and 5 servos & a 2-stroke .61-.75 or 4-stroke .91 engine.

## Recommended Products

Please note: all recommendations were the best choices available at the time of product release. For additional choices, please check with your dealer or on [greatplanes.com](http://greatplanes.com).

FUTK6901	Futaba® 6EX 6-channel 2.4GHz Computer Radio
FUTM0004	(5) Futaba S3004 Standard Ball Bearing Servo
FUTM0004	(2) Futaba S3004 Standard Ball Bearing Servo (for optional flaps)
