

Citabria

A classic
aerobatic great!

Almost Ready-to-Fly 30-35 cc Gasoline/EP Aerobat

Pilot figure not included.

It isn't hard to sum up what the Great Planes Citabria has to offer; in fact, "easy" does it just fine. It has big plane presence, making it easy to leave a lasting impression at the field without giving up the small-plane assembly conveniences you appreciate. Big-plane size also makes it easy to fly and track in the air — and built-in flaps and ailerons make it easy to enjoy the full aerobatic performance of the original at a price that's easy to afford.

- A solid performer with 30-35cc gas power or a 1.60 brushless power system
- Magnetically attached front windscreen eases access to onboard gear
- Speeds assembly with: factory-installed side windows, painted fiberglass cowl and wheel pants, formed aluminum gear and spinner
- Built-in flaps and ailerons are factory-hinged and ready for aerobatics and slow fly-bys
- Includes self-aligning tail surfaces and a high-quality, steerable tailwheel
- Two-piece wing comes with struts, which can be left attached for extra transportation and assembly ease
