

AVISTAR[™] elite .46 Advanced Trainer

Sport performance. Trainer confidence.

Available in RTF and ARF versions, the Avistar Elite is the perfect choice for progressing from basic training to aerobatics using one plane and a flight instructor's assistance. Its high wing mounting and tricycle landing gear boost your confidence by adding stability and easy ground handling. The semi-symmetrical airfoil offers greater maneuverability as soon as you're ready.

- In the air fast — thanks to factory-finished, built-up wood sections; pre-hinged control surfaces; and glue-free assembly.
- Large and stable design is better able to handle windy conditions than park fliers.
- RTF includes a Tactic 6-channel, 2.4GHz radio with SLT, and an installed O.S. 46AX II engine with installed fuel tank and lines, plus propeller, spinner and "AA" transmitter batteries.
- ARF comes with mounts and hardware for using glow or electric power.
