

F-20 *Tigershark*

Sport-Scale Electric Ducted Fan ARF

85+ mph speeds!*

* At sea level using the recommended electronics.

Shown with included wingtip missiles, for display use only.

Ducted fan speed – sport-scale style.

Although Northrop spent \$1.2 billion developing the F-20, the light fighter project was abandoned in 1986 after just three prototypes had been built — only one of which survives. Still, its speed and aggressive lines captured the hearts of military aircraft enthusiasts — and of like-minded R/C modelers, who'll find plenty of both in this ElectriFly EDF.

- **Includes HyperFlow™ ducted fan unit with powerful Ammo™ 24-45-3790 inrunner brushless motor for impressive thrust and speed.**
- **Optimized air intake and exhaust areas deliver maximum ducted fan performance.**
- **Strong, lightweight AeroCell™ foam construction comes finished in high-visibility colors.**
- **Factory-hinged aileron and elevator control surfaces contribute to fast, easy, 4-6 hour assembly.**
- **Comes with display stand, decals and removable, magnetic wingtip missiles.**
