

LVM

Lithium VoltMeter

For 2S-6S Lithium Batteries

Reads cell and pack voltages in seconds!

In R/C, knowing a pack's voltage is important. With lithium packs, knowing the voltage of each cell is important, too. Here's why: the closer the voltages of all cells balance, the better the charge you get — and the better your pack performs. It's that simple.

If the cells in your lithium pack aren't charging to maximum voltages shown, you're not getting the maximum performance from your pack. Re-balance your cells — and reap the benefits!

- About the same size and weight as a flash drive — and just as affordable.
- Easy to use: just remove the protective cap and connect to your pack. The LVM displays the voltage of each cell, followed by the voltage of the entire pack.
- Exceptionally accurate: measures cell voltages to the nearest hundredth of a volt, and pack voltage to the nearest tenth of a volt.
- Includes ElectriFly battery connectors, a 2-6S adapter for FlightPower® and Thunder Power™ packs.
- Fits in a pocket, and includes a loop for secure attachment to a wrist strap, neck strap or key chain.

Maximum Voltage for:

LiPos: 4.2V/cell
LiIons: 4.1V/cell
LiFes: 3.7V/cell

Dimensions: 2.75 x 0.91 x 0.51 in (70 x 23 x 13 mm)

Weight: 0.43 oz (12.3 g)

Voltage Range: 2S-6S (5.5V-25.2V)

Works with these and other popular brands of lithium batteries!

- FlightPower®
- TrakPower™
- LiFeSource™
- SuperTigre®
- AquaCraft® Models
- Duratrax®
- Thunder Power™
- Venom®
- ...and more!
