REALFLIGHT® R/C FLIGHT SIMULATOR G5.5™

The most realistic recreation of R/C flight ever!™

- ***Over 80 aircraft to fly!***
- ***Over 30 flying sites to explore!***
- ***Includes the InterLink® Elite controller — with digital trims, QuickSelect™ and a built-in transmitter interface!***

RealFlight G5.5 builds upon the award-winning RealFlight G5 to become the best version yet!

Whether you're a newbie or a pro, RealFlight remains the easiest way to learn and master your R/C flying skills. You can do it all without having to go to the flying field…or risking your favorite model.

G5.5 features two new multiplayer combat modes: DeadRinger™ and Hardcore Combat. In DeadRinger, you're trying to be the first player to fly through suspended rings in the sky. Unfortunately, your opponents are too – and they have guns! Hardcore Combat tests your mettle as you try to execute high-g maneuvers that will cause your vision to fade as you move in for the kill.

MODEL Airplane NEWS
2010 INNOVATION OF THE YEAR

- Two new glider launch options! Your first option is a bungee launch. Choose an aero tow, and a tow plane pulls you to altitude — automatically.
- Perfect aerobatic flight patterns by laying the colored Sky Grid across the sky of any flying site.
- Heli pilots can set up "random" tail rotor failures to test their skills.

A full-feature transmitter with digital trims and QuickSelect

INTERLINK® ELITE CONTROLLER by Futaba

The multi-patented, easy-to-use InterLink Elite is also the most versatile flight sim controller you've ever seen. It's designed after the popular Futaba 6EX — complete with digital trims!

Prefer to use your own R/C transmitter? The interface you need is already built-in. With MultiMode™ you can even use the controller and interface simultaneously — a feature no other simulator has.

QuickSelect™

Controls all basic software functions — virtually eliminates the need for a mouse and keyboard!

Apply filters to QuickSelect's easy-to-use menu to narrow down your aircraft options for faster, simpler setup.

U.S. Patent #7,010,628
U.S. Patent #6,842,804

System Requirements for G5.5 and G5.5 Upgrade

Minimum Recommended System:

Some graphical features may be disabled. Aerodynamic calculations will remain high quality.

- Windows®* XP, Windows* Vista® or Windows* 7
  *Local administrator access required.
- Intel® Pentium® 1.0GHz or equivalent
- 512 MB RAM
- 4.5 GB Hard Drive Space
- DVD Drive
- 3D Accelerated Video with:
  32 MB Dedicated Video Memory
  Full Windows DirectX® 9 compliant (Pixel Shader 1.4 support)

Optimal System:

For best graphical performance

- Dual Core 2.4GHz CPU
- 2 GB RAM
- 3D Accelerated Video with:
  512 MB dedicated video memory
  Pixel Shader 3.0 support

Multiplayer Requirements:

- Broadband Internet connection
- Computer microphone for voice chat

InterLink® Elite Controller:

- USB Port
- Compatible FM or FM-selectable transmitter
  (if using the Interface mode)

For G5.5 Upgrade only

- Software and controller from RealFlight G3, G3.5, G4 or G4.5

Note: The connectors on the InterLink Elite cord and included adapters make the InterLink Elite compatible with the trainer jacks on most Futaba® and all JR®, Spektrum® and Tower Hobbies® systems. Special adapters for use with most older Futaba and Hitec® systems are available separately.

Activation Required
