REALFLIGHT® 6
R/C FLIGHT SIMULATOR
True to Life™

Here's what's new in RealFlight 6!

Rewind and Reset
RealFlight is still the only sim with a Reset button. Push it after a crash, and you're instantly ready to fly again. Hold down the button, however, and you can rewind your current flight to any point — and start flying again.

Safety Alerts
Displays a checklist of safe R/C flying practices at the start of some flights.

Faster-loading
Start typing the name of an airplane or flying site, and RealFlight will instantly display it onscreen.

Faster and easier to edit
Make simple changes to aircraft with just a couple of keystrokes.

Vastly Improved Heli Physics
Updated with feedback from Brian Bremer, Matt Botos, Bobby Watts and other expert heli pilots. The result: more precision in flight, more accurate crash modeling — and the most realistic "feel" and response ever.

New, more intuitive heli controller!
RealFlight 6 versions with the Heli Mega Pack also include an updated, heli-style InterLink Elite controller. It has a non-ratcheted throttle and the switch and rotary knob for Channels 6 and 7 are where they are on R/C transmitters.

GPMZ4460 RealFlight 6 w/Airplane Mega Pack Mode 2
GPMZ4461 RealFlight 6 w/Airplane Mega Pack Mode 1
GPMZ4462 RealFlight 6 w/Heli Mega Pack Mode 2
GPMZ4463 RealFlight 6 w/Heli Mega Pack Mode 1

* Mega Packs also available separately.

Comes with a bonus Mega Pack with DOZENS more airplanes or helis!

RealFlight 6 alone offers over 85 models to fly. But it also comes with your choice of two Mega Packs:
Airplane Mega Pack adds 36 more planes
Heli Mega Pack adds 47 additional helis

Test-fly RealFlight 6 today!
Discover why it's the world's #1 R/C flight sim!

- **It's best for flight training.**

  With RealFlight, you can learn to fly without the real-world risk and cost of a crash. And if you do crash, push the Reset button — and you're back in the air instantly!

- **It's the 24/7 Flight School.**

 You can fly any time of day or night, regardless of the weather — and there are always Virtual Flight Instructors and training aids ready to help you learn.

- **It's "True to Life"**

  On RealFlight, winds blow and surfaces reflect. The graphics and physics are so accurate that it's like flying an actual aircraft. And with all of the aircraft, flying site and customizing choices it offers, there's virtually no scenario you can't recreate!

- **It's FUN!**

  With RealFlight, you can really relax and enjoy R/C. You can go on a leisurely solo flight, tackle a challenging obstacle course or even engage in online combat with friends.

- Paintball
- Streamer Cut
- Machine Gun
- Multiplayer

Training Aids & Virtual Flight Instructor™

The virtual training aids can teach you almost everything about R/C flying — from taking off and landing, to hovering, even advanced aerobatic maneuvers, with advice from expert pilots! Best of all, you're learning without risking your actual models!

More reasons why RealFlight is the #1 flight sim

- Over 85 aircraft included — and hundreds more available online
- More than 30 PhotoField™ and 3D flying sites
- Reset button
- Online multiplayer
- Game-style combat events
- Onboard cameras
- Night flying
- Water takeoffs and landings
- "Full coverage" collision detection
- Training aids, including Virtual Flight Instructor
- Unlimited customizing for flying sites and aircraft
- "Depth of Field" effect
- Orientation aids, including Overhead View, Wing Tip Trails and Sky Grid
- Enhanced visual effects

Machine Gun

Paintball

Rewind *and* Reset!

Depth of Field Effect

When turned on, this feature keeps your model the visual focal point of your simulation — while anything that falls outside of its immediate vicinity loses sharpness.
