

The sim that sets the standard in R/C flight!

InterLink® Elite Edition

Offers the look and feel of a real transmitter, and total control of all RealFlight features.

Tactic™ Tx-R Edition

Use the TTX600 as a RealFlight controller – or as a 2.4GHz transmitter for R/C aircraft. Includes SLT – ideal for all Tx-R aircraft!

Interface Edition

Instantly turns your favorite Futaba®, Spektrum®, JR® or Hitec® radio into a controller for RF7.

Upgrade to RF7

There's a reason why RealFlight has been the best-selling R/C flight sim for over 16 straight years: it never stops getting better.

Unparalleled flight physics ensure that aircraft respond like their real-world counterparts. Its state-of-the-art graphics are constantly evolving to narrow the gap between simulation and reality. RealFlight also offers an ever-expanding selection of aircraft and flying sites and matches it with the power to modify virtually every aspect of the way they look and perform.

GPMZ4500	RealFlight 7 w/Interlink – Mode 2
GPMZ4501	RealFlight 7 w/Interlink – Mode 1
GPMZ4504	RealFlight 7 w/Interface
GPMZ4508	RealFlight 7 – Upgrade for G4 and above
GPMZ4510	RealFlight 7 w/Tactic TTX600 Transmitter

- Includes over 135 real, R/C and fictional aircraft, ranging from bipes, aerobats and fighters to helis, gliders and quads
- Features over 40 PhotoField and 3D flying sites
- Easy to use: just select an aircraft and flying site -- and fly.
- Great for pilots of all skill levels. Includes Virtual Flight Instruction and training aids for learning new piloting skills, plus Skills Challenges for polishing current ones
- Includes the industry's only "Rewind/Reset" feature: just push to start a new flight or review the last
- Multi-player feature – connect to the Internet to do one-on-one tutoring, host multiplayer events, fly combat missions or share custom aircraft/flying sites with other pilots
- Free software updates downloadable at realflight.com
- Available as a software-only Upgrade (for G4 and up) or in three software/hardware versions
