

RF7.5

REALFLIGHT®

Wired Transmitter Interface Edition

GPMZ4525

No other R/C simulator captures the experience of flying as completely and accurately as RealFlight, and RF7.5 raises the bar even higher! Among RF7.5's innovations: the Reset/Rewind button that instantly gets you back in the action. RealPhysics™ technology has been further refined to recreate the nuances of multi-rotor aircraft — and speaking of multi-rotors, there are several popular designs in RF7.5 that you can fly in any of the over 30 flying sites as well as in new Challenges. RF7.5 makes learning and honing R/C flying skills easy and fun, and because it's so true to life, you'll fly confidently and instinctively at the field!

Fly, hover, soar...
and so much more.

Fly with your favorite transmitter after you're connected to RF7.5 by way of the interface. A setup window helps you quickly configure RealFlight, and one of the sim's most popular features — the Reset/Rewind button — is incorporated right into the interface.

- A total of over 140 aircraft
- Over 40 flying sites to explore
- Game-like Challenges
- RealPhysics™ 3D
- TrueView™ realistic lighting
- Virtual Flight Instructor (VFI)
