

Get your hands on the ultimate RC experience

Includes Interlink-X Controller for total simulation control.

InterLink-X GPMZ4540

RealFlight has more to offer than ever before. The supremely realistic physics which have drawn pilots to RealFlight since the first edition hit the market are back and further improved. Accessing RealFlight is easier than ever with a simple, intuitive interface which virtually guarantees you'll be up and flying in moments. There's zero learning curve, zero hassle, just flying fun.

Once you're in, the unbounded scope of the flying sites will astound you and their detail will draw you in. Numerous fan-favorite flying sites have been remastered. There are new sites like Wasserkuppe in Germany and Calahorra Castle in Spain to enjoy as well. Plus, over fifty new aircraft, detailed to the panel lines and rivets, await your every command.

Pick up this version of RF-X and get all the detail, the physics, and the realism with the supreme confidence of the only controller custom-designed for RF-X pilots—the Interlink-X!

RF-X Features:

- Unparalleled physics make RealFlight the #1 RC flight simulator on the market
- Simple, intuitive interface—zero learning curve, zero hassle
- Unprecedented, immersive graphics driven by UNIGINE
- Hone your drone flying with the most advanced simulations offered by RealFlight ever
- Real-life flying locales like Wasserkuppe in Germany and the Castle in Calahorra
- Trees in all shades and shapes, humidity haze, sunlight glare—an experience as rich as real life
- Fly without boundaries in the Sierra Nevada—8 million acres of soaring
- Hone your FPV flying skills with intricate drone race courses as detailed as being at the field
- Remastered flying sites like Joe's Garage bring nostalgic locales to new life
- Tier-system game-like challenges to refine your flying skills
