

PIPER J-3 CUB

Ready-to-Fly Electric Airplane

**Realistic looks, ready-to-fly ease —
and 2.4GHz, 4-channel control!**

Combine classic Cub styling, realistic performance and ready-to-fly convenience, and the result is this easy, exciting way to enjoy R/C flight. Fully assembled and equipped — only 4 “AA” batteries are required — the Cub is just minutes away from the first takeoff. Factory-applied decals top off its scale-like looks...and thanks to 4-channel control, it even flies like a full-size plane.

- **Final assembly takes only a few minutes.**
- **One-piece wing is reinforced for durability.**
- **Includes a powerful 380-size motor, ABS cowl, easy-access battery hatch and heavy-duty aluminum landing gear with foam wheels.**

HCAA2500
WINGSPAN: 36 in (915 mm)
LENGTH: 26 in (660 mm)
REQUIRES: 4 “AA” batteries
