

albatros

Be a backyard ace!

The Albatros is so compact that you can fly it almost anywhere — and so impressive that it will be the center of attention wherever you go. Flyzone offers it in two levels of convenience, as an RTF or Tx-R. Both feature authentic looks that start with a true

WWI trim scheme and colors, and also include such details as a replica engine in the nose and a customizable pilot figure for the cockpit.* Launch by hand or off-the-ground, and enjoy!
