

AXE™ 100 FP

Ready-to-Fly Electric Flybarless Helicopter

*Designed for
forgiving flight*

The Axe 100 FP is a compact heli with two sides. Take it out of the box and it's as rock-steady as they come, yet agile enough to fly indoors in small areas or outdoors in light winds. A flybarless fixed pitch rotor head and "TAGS" 3-axis gyro make hovering almost automatic and effortless. Both the RTF and Tx-R versions feature SLT compatibility and come with a 3.7V 150mAh Lipo flight battery and USB-compatible charger.

- **TAGS (Triple Axis Gyro Stabilization) stabilizes the heli on three axes and prevents outside forces from affecting performance**
- **A simple, durable flybarless rotor head offers greater efficiency, more control and a wide performance range**
- **All other onboard equipment — including a motor, ESC, digital rotary-drive servos and SLT receiver — is factory-installed for convenience**
- **RTF includes a 2.4GHz radio with SLT, digital trims and Beginner and Expert modes**

HMXE0815 Axe 100 FP Electric Flybarless Heli RTR

HMXE0816 Axe 100 FP Electric Flybarless Heli Tx-R

ROTOR DIAMETER: 9.4 in (239 mm)

RTF WEIGHT WITH BATTERY: 1.3 oz (37 g)

LENGTH: 8.7 in (221 mm)

RTF REQUIRES: Nothing

TX-R REQUIRES: 4-channel transmitter with SLT

China Patent Number 201010559370. Other worldwide patents pending.
