

# AXE<sup>™</sup> 100 CP

Ready-to-Fly Electric Flybarless Helicopter

***Fully aerobatic  
flight indoors  
and out***

The features that make the Axe 100 CP a superior aerobat are also the ones that make it one of the most innovative helis available. A flybarless collective pitch head gives it a wide performance range, making it easy to maneuver and control in the smallest of spaces. The “TAGS” triple-axis gyro adds confidence-building stability. Both the RTF and Tx-R versions feature SLT compatibility, and include two LiPo flight packs, a charger, spare blades, linkages and a screwdriver.

- ***TAGS (Triple Axis Gyro Stabilization) stabilizes the heli on three axes***
- ***All onboard equipment — including a motor, ESC, digital rotary-drive servos and SLT receiver — is factory-installed for convenience***
- ***Both models include an AC charger and two 200mAh LiPo batteries for non-stop flying action***
- ***RTF includes a 6-channel 2.4GHz radio with SLT, 10-model memory, digital trims, programmable pitch and throttle curves and more***

**HMXE0820** Axe 100 CP Electric Flybarless Heli RTR

**HMXE0821** Axe 100 CP Electric Flybarless Heli Tx-R

**ROTOR DIAMETER:** 9.5 in (241 mm)

**RTF WEIGHT WITH BATTERY:** 1.6 oz (46 g)

**LENGTH:** 9.5 in (241 mm)

**RTF REQUIRES:** (8) “AA” batteries

**TX-R REQUIRES:** 6-channel heli transmitter with SLT

China Patent Number 201010559370. Other worldwide patents pending.
