LiPo Safety

RTF
READY-TO-FLY

Looking for something bigger than “palm-sized” but lower priced than 350-size machines? The 230Si is perfect. Stable, easy to see and suitable for outdoor flying, it's a fine choice for seasoned pilots and first-timers — whose odds for success improve dramatically by making use of the model's amazing, built-in intelligent technology.

Two versions of the 230Si are available. One includes an HD digital onboard camera, plus 2GB memory card and USB card reader for saving your images. The other does not, but the camera is available separately.

- Fly indoors or outdoors. LEDs integrated into the body make it easy to see in low-light conditions.
- Complete with 2.4GHz SLT radio, LiPo battery, balancing AC LiPo charger, “AA” batteries and extra rotor blades.
- Intelligent Control modes can be set for beginner-friendly flight or more challenging performance.
- TAGS-FX with 3 gyros and 3 accelerometers provides maximum stability.
- Enjoy up to 15 minutes of uninterrupted quadcopter fun per battery charge.

HMXE0846 230Si Quadcopter RTF with Camera

HMXE0847 230Si Quadcopter RTF without Camera

Diagonal: 230 mm (9.1 in)

RTF Weight (without camera): 127 g (4.4 oz)

RTF Weight (with camera): 132 g (4.7 oz)

Requires: Nothing

Also available separately:

HMXZ0001 Heli-Max Digital Flight Camera
