

AXE™ CX Nano

Ready-To-Fly Coaxial
Electric Helicopter

PALM-SIZED HELI FLYING AT ITS BEST!

*Fly it now™
— no experience needed!*

The Axe CX Nano is so easy to fly, anyone can do it — and so well-constructed, everyone will enjoy it! Quality components and dual, counter-rotating blades combine to deliver smooth, stable performance, and with its incredibly small size you can pilot the Axe CX Nano in any room of your home or office.

- Looks and flies like a real helicopter — and only 6" long
- Main blades swivel in the blade grips... part of the durable design that makes the Axe CX Nano ideal for first-time pilots
- High-capacity 350mAh LiPo battery delivers up to 10 minutes of flight time
- The 4-channel 2.4GHz radio comes with digital servos and a heading hold gyro
- Overcurrent protection shuts off the motor when the blades make contact and stop turning, which keeps the electronics protected and saves on repairs

HMXE13**
