

GT15 AIR ENGINE

SOLID, GAS-POWERED PERFORMANCE

GT-15 Air Engine

The GT15 is the newest and smallest offering in the OS Engines gasoline engine line. It weighs only 904g and cranks out over 2 horsepower at 15,000 rpm! Plus, it's compact enough to fit in most airplanes that require a 2-stroke 61-size or 4-stroke 91-size engine. The O.S. designed carburetor and regulator are made specifically for this engine. Other great features include a PD-08 fuel pump which assures consistent fuel delivery. Plus, a compact IG-06 ignition module which provides fast starts and smooth performance. Every single performance-increasing feature that could be included has been included, down to the roller bearing on the con rod. O.S. has pulled out all the stops to make the best engine in its class.

OSMG1515

Displacement: 0.91 cu in (14.95 cc)

Bore: 1.090 in (27.7 mm)

Stroke: 0.976 in (24.8 mm)

RPM Range: 2000-12000

Output: 2.37 hp @ 15,000

Weight (total): 1.99 lb (904 g)

Engine: 22.3 oz (631 g)

Muffler: 6.3 oz (178 g)

Ignition: 3.4 oz (95 g)

Requires: Installation in plane and fuel.

- Engineered to deliver maximum performance.
- Includes E-4040 muffler.
