

THE GT55

PUMPED-UP GAS POWER

The GT55 is the first-ever gas engine from O.S., the product of nearly two years of research and development. It has the fit and finish you expect from an O.S. engine — and the performance of an engine designed to do only one thing: *excel!*

- Provides 20-30% more power than the other engines in its class.
- O.S. – designed IG-01 electronic ignition system for faster, easier starts and maximum performance. It also compensates for wet plugs, and signals low-voltage conditions. Draws minimal current on standby.
- Walbro® pumper carb ensures instantaneous throttle response and dependable fuel flow at all times.
- Front-mounted carb design improves airflow and simplifies linkages. It also uses shorter standoffs, which results in more secure mounting and less vibration overall.
- Ringed, lightweight aluminum-alloy piston speeds break-in and offers high-compression performance from the very first start.
- Massive front/rear bearings.
- 1-piece crankcase.
- Front-induction, rotary-valve crankshaft.
- Factory-installed carb vent nipple.
- Right/left throttle lever mounting.
- Insulator between crankcase & carb.

GT55 Gas Engine

OSMG1555

Displacement: 3.352 cu in (54.9 cc)

Bore: 1.618 in (41 mm)

Stroke: 1.618 in (41 mm)

Output: 5.5 hp @ 7,000 rpm

Practical RPM: 1,500-8,000

Includes: CM-6 spark plug,
Requires: unleaded gasoline, oil,
switch & prop

Recommended Props: 22x10, 23x8, 23x10,
24x8, 24x10
