

SPEED R2102

1/8 SCALE

ON-ROAD ENGINE

Ramping up an on-road powerhouse.

With the goal of once again dominating the world championships, O.S. has gone back to the drawing board and refurbished the Speed R2101. The result is the Speed R2102, designed to deliver the performance 1/8 scale on-road racers demand. Virtually everything about the R2102 has been tweaked, but don't worry: the key features that have made Speed engines hugely popular among competitive drivers are still here.

- Center of gravity is 3 mm lower, for better handling.
- A second inner button head allows for finer tuning to meet track conditions and higher nitro content (25%).
- New ceramic rear bearing reduces friction loss.
- Sharp new laser graphics.
- Compatible with 16% nitro fuel, which complies with EFRA regulations.
- Retains Speed innovations such as DLC coating and tungsten weighted crankshaft.
