

A 3-CHANNEL RADIO TO START WITH AND STAY WITH.

TTX300

3-CHANNEL SLT RADIO

Sport-level racers and bashers will appreciate the TTX300's many popular features, along with its amazing adjustability. With its user programmable 3rd channel this radio is extremely versatile; it can operate functions such as digs, winches and diff locks, which makes it ideal for rock crawling. It can also control lights, shifting and needle/carb adjustments, as well as multiple boat accessories.

Need more reasons? There's SLT (Secure Link Technology), which creates an unbreakable link between the receiver and the transmitter with push-button ease. The radio sports futuristic styling that's unlike any other transmitter. And all this comes at an incredibly affordable price!

INCLUDES:

- User programmable third channel that can function as a 2-, 3- or 4-position switch or for proportional control
- 3-channel TR325 micro receiver (TACL0325) with failsafe
- Steering and throttle trim and end point adjustments
- Steering rate adjustment
- Internal antenna
- 70/30 throttle setting
- Sleek new case design
- Can use any SLT receiver
