

# TTX410

4-CHANNEL SLT RADIO

## A TOP PICK FOR PRICE, VALUE AND TX-R AIRCRAFT!

Perfect as a start-up or sport system, the TTX410 puts 2.4GHz dependability in your hands at a very affordable price. SLT (Secure Link Technology) – the same protocol used in Tx-R aircraft – gives you the ability to create an instantaneous and unbreakable link between the transmitter and any number of SLT receivers. That makes the TTX410 a shrewd buy for the transmitter-ready aircraft you own today – and a great investment in future Tx-R aircraft, too.

### Includes:

- Wireless trainer system, plus wired system with a 3.5mm round jack
- Digital trims with memory, fast/slow step adjustment & sound cues (all channels)
