

MS CONNECT

ESC Programming Adapter

EXPAND PROGRAMMING OPTIONS WITH YOUR PC!

Install MS Connect between your MS Series ESC and PC, and you can tap into tuning options you can't do manually.

Setup and adjustments are fast and easy. Graphics simplify navigation, allowing you to select and open one of four menus. Settings within each menu are clearly identified and equipped with a slider switch. Click and drag the cursor to the setting you want, and confirm it on the settings display below. There's also a firmware update tab, so you can download updates and keep your ESC's competitive edge! For sophisticated results and simple, step-by-step programming, it's MS Connect.
