FLY A CONTEMPORARY

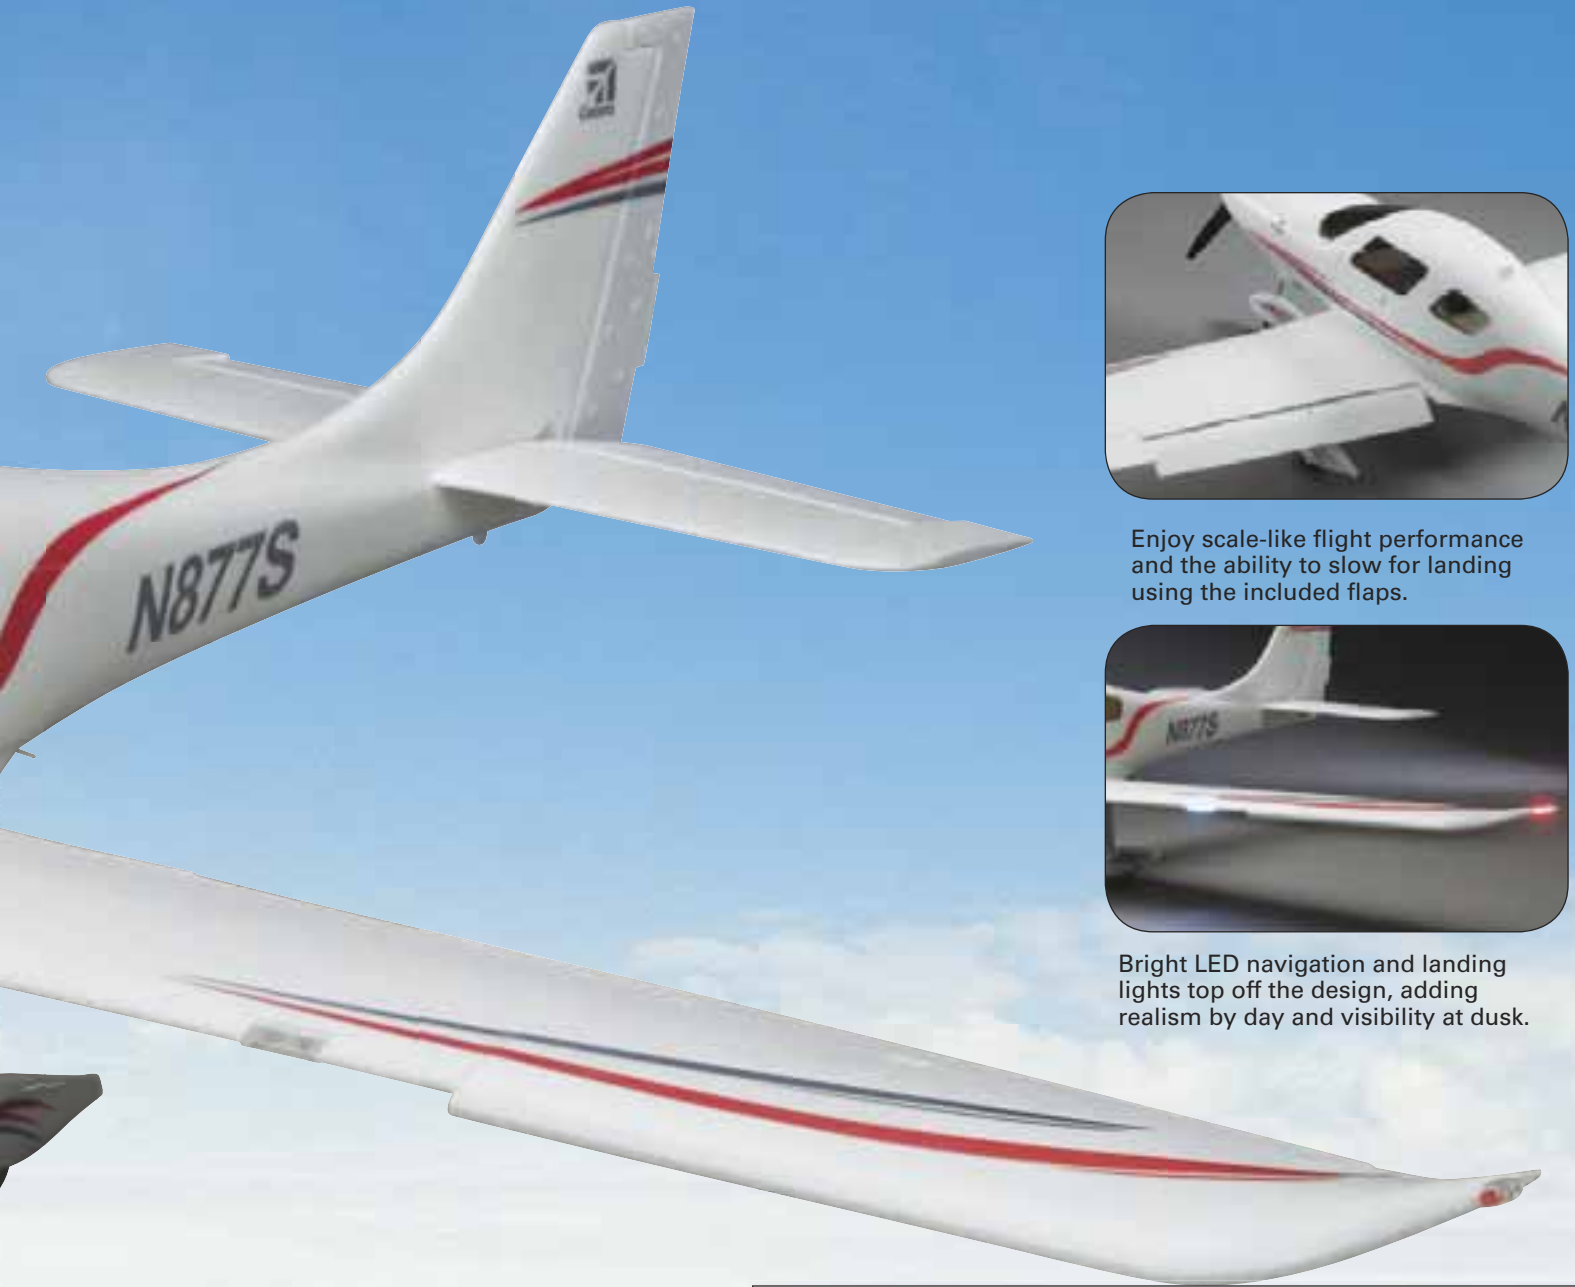

CESSNA[®]
CORVALIS[®]

**Select
Scale™** **Rx-R[®]**
RECEIVER-READY

- Accurately replicates the sleek styling of the Corvalis, right down to the trim scheme, detailed interior and bright LED navigation and landing lights
- With just 2 tools and about 30 minutes you'll be ready to hit the flight line — a quality brushless power system and servos are already installed
- Exhibits excellent scale flight for intermediate and advanced pilots, with working flaps that let you slow for landing
- In addition to looking scale, the tricycle landing gear features a shock-absorbing steerable nosewheel.

CLASSIC

Enjoy scale-like flight performance and the ability to slow for landing using the included flaps.

Bright LED navigation and landing lights top off the design, adding realism by day and visibility at dusk.

HCAA2534 Select Scale Cessna 350 Corvalis EP Rx-R
Wingspan: 57 in (1450 mm)
Weight: 2-2.25 lb (910-1020 g)
Length: 38 in (965 mm)

Flyzone™

Cessna 350, Corvalis, emblems, logos, and body designs are trademarks of Textron Innovations Inc. and are used under license by Hobbico®, Inc.

From the Experts:

This Select Scale Cessna 350 Corvalis is Flyzone's most advanced model yet! Final assembly hardly qualifies as "assembly" and when finished you'll have a beautiful scale version of an aviation classic. Busy modelers will appreciate the Corvalis' Receiver-Ready convenience, and its flight characteristics are every bit as scale as its looks!

Long story short...

Select Scale technology precisely captures the elegance and performance of Cessna's extraordinary Corvalis!

NEW PRODUCT

A NEW TAKE ON AN R/C ORIGINAL

www.gpdealer.com

EP Falcon ARF

- Made with Pro-Formance™ foam, for an airframe that's strong and lightweight
- The ElectriFly® RimFire™ 250 outrunner brushless motor is an economical choice for powering this aircraft
- Rubber bands make attaching the wing fast and simple, and allow the wing to pop off in the event of a crash
- An agile indoor flyer, the EP Falcon's included wing doubler expands your flying options to include outdoor flying

From the Experts:

The legendary Goldberg Falcon ARF has now been re-engineered with today's technology, including foam construction and brushless electric power. And the EP Falcon's size makes it ideal for flying both indoors and outdoors.

Long story short...

The Falcon's clean lines and superb flight characteristics are just like you remember them...only better.

GPMA1940
Carl Goldberg Classics by Great Planes EP Falcon ARF
Wingspan: 37 in (940 mm)

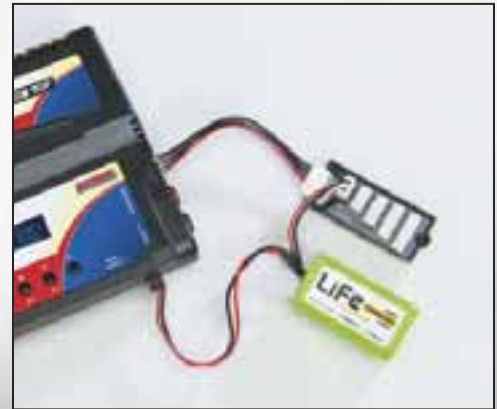

NOW WITH BALANCING!

ONYX 235

- Handles a HUGE range of charging and balancing needs for electric on-road, off-road, boat and radio applications
- Charge currents up to 8 amps, and output voltages for charging 10-cell NiMH up to 4S LiPo packs make the Onyx 235 ideal for 1/32 scale micros up to 1/8 scale electrics — plus nitro receiver packs and transmitter batteries
- A USB jack allows for charging music players, cell phones, etc. while at the track; a built-in radio battery jack is also included
- AC/DC flexibility with detachable input cords for use anytime, indoors or out
- The reverse back lit LCD screen makes for easy viewing, and menus are easy to use

The balancer optimizes pack performance for 1-4S LiPo, Li-Ion or LiFe cells, and is built right into the unit.

From the Experts:

What do you get when you add the convenience of a built-in balancing system to all of the other superlative features of Onyx's most advanced charger? You get the Onyx 235 AC/DC Advanced Charger w/Built-in Balancing, the new flagship of the Onyx line. Besides the capability to charge virtually every kind of battery, the 235's balancing function maximizes the power of every cell.

Long story short...

The all-in-one Onyx 235 AC/DC Advanced Charger w/Built-in Balancer sets the new standard for versatility and convenience!

BRING BAJA 1000 THRILLS TO YOUR BACKYARD!

HPI 1/5 Scale Baja 5SC 2.4GHz RTR

- A skid-plate front bumper and large rear bumper with rubber mud flaps add durability and realistic looks
- Power comes from a massive 26cc Fuelie engine that propels the Baja 5SC to speeds of over 40 mph
- More than 45 minutes run time on a single tank of regular unleaded gasoline
- Extra traction is provided by HB Rodeo tires, mounted on TR-10 beadlock truck wheels
- A 2.4GHz radio delivers interference-free control without crystals
- Preassembled by the expert HPI crew to be ready to hit the dirt right out of the box!

hpi-racing

HPID61** 1/5 Scale Baja 5SC 2.4GHz RTR

Long story short...

For those who like their racing big and bold, the Baja 5SC fills the bill perfectly!

FUTABA® CGY750 GYRO W/GOVERNOR

Futaba enters the flybarless revolution with the CGY750!

- Offers flybarless control AND a governor in an amazingly compact, lightweight unit
- Quick set-up with Basic and Expert menus, on a large, easy-to-read OLED display
- Supports all swashplate types

The R6203SB S.Bus receiver is the perfect choice for use with the CGY750 or any S.Bus application, and is available separately. It features 3 "normal" channels or as many channels as your transmitter has available if using S.Bus. It's a full range FASST receiver with dual antennae and Pre-Vision™, and is high-voltage capable.

O'DONNELL RACING FUEL® SPEED BLEND™

Never before has there been a racing fuel like this!

- Only the absolute highest-quality ingredients and oil package go into the making of Speed Blend fuel
- State-of-the-art computerized blending and extensive quality control ensure that every bottle delivers performance that's second to none
- You can count on Speed Blend fuel to deliver:
 - Smoother idle
 - Crisper throttle response
 - Improved fuel economy
 - Cooler engine temperatures
 - Higher RPM
 - Cleaner burning
 - No staining

- ODOP4420 Speed Blend Fuel 20% Gallon
- ODOP4425 Speed Blend Fuel 25% Gallon
- ODOP4430 Speed Blend Fuel 30% Gallon
- ODOP4520 Speed Blend Fuel 20% Quart
- ODOP4525 Speed Blend Fuel 25% Quart
- ODOP4530 Speed Blend Fuel 30% Quart

Long story short...

In the heat of competition your choice of fuel can make all the difference — make sure you're going with a winner: Speed Blend from O'Donnell Racing Fuel!

TRAKPOWER™ LIPO BATTERIES

Packs that are all about pure power and high speeds!

50c and
60c
ratings!

- High capacity for extended run times
- Featuring genuine Deans® Ultra Plug® connectors
- A hard case protects the batteries from the elements and crash damage
- Approved for ROAR-sanctioned 1/8 and 1/10 scale events
- There's a cell number, voltage and capacity that's just right for your kind of racing!

DEANS® and ULTRA PLUG® are registered trademarks of W.S. Deans Co. U.S. Patent No. 5,533,915.

- TKPC0270 TrakPower 2S 7.4V 50C 6200mAh LiPo
- TKPC0390 TrakPower 2S 7.4V 60C 5600mAh LiPo
- TKPC0450 TrakPower 4S 14.8V 60C 5600mAh LiPo

Long story short...

These new packs represent the latest in LiPo technology from TrakPower!

FLIGHTPOWER® PRO50 LIPO BATTERIES

Enormous power for high-performance aircraft!

- With whopping 50C continuous discharge currents and 100C burst currents, Pro50 LiPo packs allow brushless motors to crank out massive power!
- Charging is surprisingly quick using 6C maximum charge current, so you spend more time in the air
- Don't worry about extended use — you can use Pro50 packs OVER 300 TIMES, and they'll still deliver the performance your model requires
- A wide range of voltage and capacity selections, including ideal applications for large-scale and 3D aircraft

TAMIYA® 1/10 SCALE RAYBRIG HSV-010 KIT

Drive a scale version of the Super GT 500 competitor!

- Accurately captures the sleek profile of the Honda Raybrig HSV-010 racer, right down to the separately molded ABS side mirrors and rear wing
- The two-belt drive TA05 Ver. II chassis offers superior control, easy handling and less maintenance
- Medium-narrow racing slicks and 6-spoke wheels complete the look
- Replicate the full-size Team Kunimitsu Raybrig with the included decals and masking seals!

TAMC8472
1/10 Scale Raybrig HSV-010 Kit

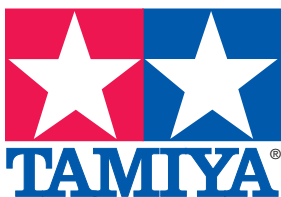

Long story short...

You'll stand out at the track with the Raybrig HSV-010...it's one lean, mean racing machine!

TAMIYA® 1/10 SCALE 2WD ZAHHAK-DN01 BUGGY KIT

A rising star among off-road racers!

- Based on the TRF201 buggy driven to victory by Lee Martin at the recent European 2WD Off Road Championships
- The battery is positioned longitudinally for optimum balance and a low center of gravity with plenty of ground clearance
- A rear-mounted motor boosts traction and acceleration
- Front and rear CVA oil dampers handle rough terrain with ease

TAMC8477
1/10 Scale 2WD Zahhak-DN01 Buggy Kit

Long story short...

The 2WD Zahhak-DB01 Buggy is the perfect machine for starting and advancing in R/C off-roading!

AKAC3702 1/8
Scale EVO Buggy
Wheel-Yellow (4)

AKA 1/8 Scale EVO Buggy Wheels

A stiffer wheel without sacrificing weight or durability!

- Utilizes a concave wheel face to better combat the G-forces of the modern 1/8 scale buggy chassis
- An internal dish helps the innermost bead hold its shape and keeps dirt from getting trapped within the inner ribbing and throwing the wheel out of balance
- A huge advantage on rough and high-bite tracks, as well as layouts with large jumps and high-speed sections!

AKAC3701 1/8 Scale EVO Buggy Wheel-White (4)

AKAC1607
1/8 Scale Impact
Buggy Tire-Super Soft

AKA 1/8 Scale Impact Buggy Tires

- The dense small square lug pattern with center rows of offset lugs offer maximum forward traction and excellent wear
- Two outer rows of parallel lugs give the tire very predictable side bite

AKAC1610 1/8 Scale Impact Buggy Tire-Super Soft

ASCC0482
Nexxt 4/Vector Micro
6900kV Combo

Associated Nexxt 4X/Vector Micro 6900kV Combo

The perfect pairing for unparalleled brushless performance!

- The Nexxt 4 is a super-lightweight sensorless speed control with eight power profiles for the finest adjustments within all classes of motors
- The sensorless Vector Micro motor delivers more power and longer runtimes with zero maintenance
- Revolutionary LRP software allows for sensed driveability with the Nexxt 4 even without hall sensors

Castle™ Creations Sidewinder 12V Sport ESC & Combos

Brushless power systems made affordable for sport drivers!

- Unmatched power and reliability for 1/10 scale sport models
- Features proportional brake, reverse w/lockout, programmable low voltage cutoff and more
- Can be easily configured to be used with brushed motors too
- Fully functional, yet easy to use — and completely compatible with Castle Link™ software and Windows PC for even more customization
- There's a Sidewinder ESC/Motor Combo that's just right for your driving!

UPGRADE TO FUTABA FASST NOW!!!

Trade in your old 2.4GHz radio when you buy a state-of-the-art FASST system...and get up to \$400 in new Futaba gear!

Ready to retire an old 2.4GHz radio? Or just fed up with inferior spread spectrum technology? NOW is the time to upgrade to the advantages of Futaba FASST — and we'll make it even more worth your while!

Purchase a new FASST system by April 30, 2011 and send in the old, worn out, even broken 2.4GHz system that you're replacing — and get a certificate worth up to \$400 toward Futaba merchandise! Certificate values vary depending on the FASST system purchased and the trade-in radio sent in. Refer to the chart listed for the amounts available.

You deserve the best radio, and that's a Futaba FASST system. And for a limited time you can also enjoy the bonus of FREE Futaba products!

Visit futaba-rc.com for program details, qualifying radios, official rules and the downloadable rebate request form.

When he's not building a full-size vehicle on the set of his hit SPEED Channel series, GearZ host and executive producer Stacey David can often be found working on a model car. As a way to relax while maintaining his creative edge, Stacey has been a hobbyist as long or longer than he's been fixing and modifying real cars. Starting his 5th season of GearZ in 2010, David previously hosted and produced another popular automotive series on SpikeTV for eight years.

Now, Stacey David is teaming up with Revell to launch the inaugural Model Car Championship! Judges will include Stacey himself, along with David Carl Peters, automotive artist and acclaimed model car builder; Roy Sorenson, publisher/editor of Plastic Fanatic model car magazine; Dr. Marc Weller, M.D., longtime contributor to Scale Auto magazine and avid hot rodder; Drew Hiewarter, Scale Auto columnist and model making authority; and Jason Sakurai, a longtime modeler and former editor of Scale Modeler magazine.

1/72 SCALE P-51D MUSTANG

The definitive Allied fighter plane.

Developed and built by North American Aviation in just 117 days, the P-51 Mustang rapidly evolved into one of WWII's most revered fighter planes. British and American pilots alike praised the P-51 for its dynamic dogfighting agility and the deadly firepower of multiple .50-caliber M2 machine guns. Countless historians and aviation experts consider the P-51D to be the definitive Allied fighter plane. The "D" variant was powered by the supercharged Packard V-1650 engine and featured six machine guns (instead of four), as well as a bubble canopy for improved visibility.

- Kit includes two new decal marking options:
1.) U.S.A.A.F. 3FG, 3FS, Code: 464076 and
2.) U.S.A.A.F. 4FG, 334FS, QP-D: 414606.
- Total number of parts: 56. Skill level 3.

From the Experts:

Extraordinary Hasegawa detail and brand-new decal options make this Mustang a must-have!

Long story short...

If you have to choose just one 1/72 scale Mustang to build this year, choose this incredible P-51D kit from Hasegawa!

01455-8
HSGS1455

1/32 SCALE MITSUBISHI A6M5C ZERO FIGHTER TYPE 52 HEI "JINRAI SQUADRON"

The Hellcat's most formidable foe.

The introduction of the A6M5 Zero Type 52 signaled a series of changes for one of WWII's most famous fighters – all of which were required in order to effectively take on the F6F Hellcat and the F4U Corsair. An improved exhaust system helped increase thrust and enhanced the roll rate for all models. A6M5c variants also added thicker, protective armored glass for the windshield and armor plating behind the pilot. Weapons modifications included three .51 inch guns, two 20 mm Type 99-II guns and storage for a 250 kg bomb.

- This limited edition kit features new resin cowling parts and two exciting marking options:
 - 1.) I.J.N. 721st N.F.G. "Jinrai Sq.," Code: 721-23, Miyazaki AB, Feb., 1945 and
 - 2.) I.J.N. 721st N.F.G. "Jinrai Sq.," Code: 721164, Miyazaki AB, Feb., 1945.

- Total parts: 95. Skill level 3.

08209-0
HSGS8209

From the Experts:

Hasegawa has turned a classic WWII aircraft into a 1/32 masterpiece, offering modelers remarkable realism and superior scale details.

Long story short...

Join the Jinrai Squadron – and enjoy traditional Hasegawa quality – with this exceptionally designed "Zero" kit!

NEW PRODUCT

1/72 F-16F (BLOCK 60) FIGHTING FALCON

The dynamic "Desert Falcon."

Developed especially for the United Arab Emirates, the two-seat F-16F (Block 60) comes fully equipped with exciting, cutting-edge upgrades. Its unique AN/APG-80 Active Electronically Scanned Array (AESA) radar can simultaneously track and destroy ground and air targets. A Falcon Edge Integrated Electronic Warfare Suite Radar Warning Receiver with a Self-Protection Jammer displays any potential enemy's bearing and range. An advanced fiber-optic data bus system is also included, which can handle 1,000x the data of a standard serial data bus system!

- This limited edition kit features new camera pod parts, dorsal span panel parts and four marking options:

- 1.) U.A.E. A.F, Code: 3005;
- 2.) U.A.E. A.F, Code: 3001;
- 3.) U.A.E. A.F, Code: 3010 and
- 4.) Extra Decal Sheet, Code: 3008.

- Total parts: 107. Skill level 3.

01930-0
HSGS1930

From the Experts:

The F-16F's exceptional details and exciting limited edition bonuses are sure to satisfy jet fighter fans of all ages!

Long story short...

The Hasegawa 1/72 F-16F Fighting Falcon is just as feature-filled as the full-size aircraft – and it looks incredible, too!

1/25 SCALE '77 CHEVY® MONTE CARLO™
Cruise in style with this classic "Carlo."

The stylish 1977 Chevy Monte Carlo was the final second-generation model to roll off the Flint, Michigan assembly lines. Back then, drivers could choose between the 140 hp, 305 cu. in. 2-barrel V-8 and the optional 170 hp, 350 cu. in. 4-barrel V-8. Today, the '77 Monte Carlo is a favorite of custom builders, who often drop in even bigger power plants! This easy-to-assemble snap kit features a highly detailed chassis, a realistic interior, rolling wheels, positionable axles and decals with stock and custom graphics.

RMXS1962 Total parts: 36 Skill level 1 Length: 8.6 in (219 mm)

1/485 SCALE U.S.S. YORKTOWN AIRCRAFT CARRIER
The Battle of Midway's celebrated hero.

Launched in April, 1936, the U.S.S. Yorktown was among the first "true" aircraft carriers ever built. During the Battle of Midway, the Yorktown scored a decisive victory against the Japanese, with the help of the U.S.S. Enterprise and the U.S.S. Hornet. For the heroic sacrifices made by her soldiers in this battle, the Yorktown earned three battle stars. Kit features highly detailed hangar and flight decks with optional-position deck elevators and cranes, twenty Douglas SBD dive bombers, a display stand and official U.S. Navy marking decals.

RMXS3017 Total parts: 114 Skill level 2 Length: 20.3 in (515 mm)

1/25 SCALE '68 CORVETTE® L88 "REBEL" RACER
The competitive endurance racer is back!

Designed especially for competing in endurance road racing, the '68 Corvette L88 "Rebel" Racer featured a stylish roadster body with an optional, removable hardtop. A Big Block 427 cu. in. engine helped launch the "Rebel" to fantastic first-place finishes at the 1972 12 Hours of Sebring Endurance Race and the 1972 6-Hour Daytona Continental. Kit features a replica Big Block 427 engine, racing exhaust pipes and headers, rear fender flares, soft black tires, chrome-plated parts, unique headlight covers and decals with "Rebel" Racer graphics.

RMXS4915 Total parts: 119 Skill level 2 Length: 7.4 in (187 mm)

1/32 SCALE SELF-PROPELLED HOWITZER (RENWAL™)
Essential equipment for today's armies.

As developed and manufactured by the Pacific Car and Foundry Company, the Self-Propelled 8-inch Howitzer can fire 200-pound projectiles up to a maximum range of eleven miles. It is believed that Howitzers have been essential military equipment since the 18th century, but today's self-propelled variety most closely resembles another powerful weapon – the tank. Kit features a movable turret and gun, opening hatches, an opening rear door, rotating drive sprockets, flexible black tracks, six crew figures in multiple poses and decals with authentic U.S. Army markings.

RMXS7855 Total parts: 135 Skill level 2 Length: 10.5 in (267 mm)

SLOT CAR

1/32 SCALE COBRA® DAYTONA COUPE – #56 NÜBURGRING, 1965

A real treat for Cobra collectors.

In 1965, Carroll Shelby worked to remedy the unstable racing aerodynamics of his earlier Cobras. His solution: closed coupe styling! The Daytona Coupe went on to win the first World Championship that same year. It was soon used as an extra in the challenging Nüburgring race. It was later repainted and driven by Jo Schlesser and Andre Simon, who took third place in the GT 3 class. This 1/32 scale slot car is finely and authentically printed, with super-fine details and an individually painted driver figure. Compatible with all commercial track systems.

RVLW8316

MONOGRAM® 1/24 '85 FORD® MUSTANG SVO Unsurpassed, street-legal performance.

Ford formed the Special Vehicle Operations (SVO) Department in 1981 to develop high-performance, street-legal cars based on their racing program. Built from 1984-1986, SVO versions of the Ford Mustang were powered by a turbo-charged, inline 4-cylinder engine which produced 175 hp (or 200 hp with a few modifications!). Kit features an opening hood, a replica turbo-charged 2.3L inline 4-cylinder engine with intercooler, a uniquely designed front grille, an aerodynamic hood, a biplane rear wing, forged alloy wheels, soft black tires, satin-plated parts and decals with factory stock graphics.

MONS4276 Total parts: 66 Skill level 2 Length: 7.5 in (190.5 mm)

NEW-RELEASES

1/200 SCALE JAL B747-200 "OLD PAINT" COMBO Two thrilling ways to recreate the "Queen of the Skies."

While initial 100-series 747s offered sufficient payload and enough range for domestic flights, they required more of each for longer international flights. 200-series 747s were soon developed, including 1971's B747-200 for basic passenger flights. The famed Japan Airlines (JAL) added 747-200s to their fleet throughout the decade to accommodate the increased number of international flights. This limited edition kit combo features two sets of markings: 1. JAL "Old Paint," Code: JA8116 (Early: Dark Blue and Red Stripe) and 2. JAL "Old Paint," Code: JA8164 (Late: Grey Stripe).

HSGS0679 Total parts (x 2): 61 Skill level 3

1/72 SCALE F-4J PHANTOM II "VX-4 BLACK PHANTOM" Preferred by the U.S. Navy's test squadron.

Based in Ventura County, California, the U.S. Navy Air Test and Evaluation Squadron known as the VX-4 Evaluators was established in 1950. The F-4 Phantom II became a preferred aircraft virtually as soon as it was introduced to VX-4 in the early 1960s. The squadron, which stopped flying the Phantom II in 1990, was disestablished in September, 1994. This limited edition kit features two decal marking options: 1. U.S. Navy VX-4, Code: XF-1, "Vandy One," 1972; and 2. U.S. Navy VX-4, Code: XF-1, "Vandy One," 1973.

HSGS1926 Total parts: 108 Skill level 3

1/72 SCALE SPITFIRE MK. VIII "AGAINST JAPAN COMBO" Two spectacular Spitfires – one superior set.

Initially, the Spitfire Mk. VIII was to become a main production model, even though it was merely a Mk. VII without a pressurized cabin. Some early models also featured extended wingtips, but most offered standard ones. 1,658 Mk. VIII Spitfires were built, making it the third most-produced variant. This limited edition kit combo features three marking options: 1. R.A.A.F. No. 79 Sq., Lt. Norm Smithell, UP-F, Summer, 1945; 2. R.A.F. No. 152 Sq., UM-L, Jan., 1945 and 3. R.A.F. No. 548 Sq., (CO) Sq. Ldr. E.D. Glaser, TS-V, Feb., 1945.

HSGS1927 Total parts (x 2): 45 Skill level 3

1/72 SCALE MIG-29 FULCRUM "RUSSIAN FALCONS" Preferred for fast and furious flying.

Although the MiG-29 first flew in 1977, Cold War tensions prevented the West from seeing it until a public appearance at Finland in July, 1986. Westerners were immediately impressed with the MiG-29's agility and maneuverability. When the Soviet Union collapsed in 1991, many MiG-29s were assimilated into the Russian Air Force, and they have remained a favorite of pilots ever since. This limited edition kit features two marking options: 1. Russian A.F. aerobatic team "Russian Falcons," Code: 28 and 2. Russian A.F. aerobatic team "Russian Falcons," Code: 29 & 32.

HSGS1928 Total parts: 49 Skill level 3

1/72 SCALE J35J DRAKEN "SWEDISH SPECIAL" KIT COMBO A high-altitude, supersonic superstar.

In the mid-1950s, Cold War tensions were rapidly rising, and Sweden was in need of a jet fighter to take on enemy bombers at high altitudes. The Saab® 35 Draken was the solution. Its revolutionary "double-delta" wing configuration delivered optimal performance at any speed. In 1985, the modified J35J appeared, offering increased fuel capacity, plus upgraded electronics and weapons. This limited edition kit combo features two marking options: 1. Swedish A.F. F10, special marking, Code: 10-43 (yellow painted) and 2. Swedish A.F., special marking, (blue painted).

HSGS1929 Total parts (x 2): 63 Skill level 3

1/48 SCALE KAWANISHI N1K1-JA SHIDEN (GEORGE) TYPE 11 KOH "762ND FLYING GROUP" WWII's ultimate Japanese fighter plane.

Following its 1943 introduction, the Kawanishi N1K quickly earned a reputation for being incredibly resilient and highly maneuverable. In combat, the N1K could easily go toe-to-toe against the F6F Hellcat, as well as the P-51 Mustang and the F4U Corsair. The N1K1-Ja version featured four 20 mm Type 99 cannons mounted in the wings, but lacked the frontal 7.7 mm (.303 in) Type 97s found on earlier variants. This limited edition kit features markings for the I.J.N. 762nd N.F.G., Code: 762-56, Philippines, 1944.

HSGS9936 Total parts: 87 Skill level 3

1/48 SCALE TA-4J SKYHAWK "BLUE ANGELS"

The Blue Angels' trainer aircraft!

Used by the Blue Angels throughout the mid-1970s and 1980s, the TA-4J Skyhawk featured a "down-rated" engine and lacked weapons systems. 277 were built precisely to help pilots train for the Blue Angels' spectacular stunt shows. Many TA-4F variants were also converted into TA-4Js for this purpose as well. After serving the Blue Angels for over a decade, they replaced the A-4 Skyhawk with the F/A-18A/B Hornet in November, 1986. This limited edition kit features special markings for the U.S. Navy aerobatic team "Blue Angels," Code: 7.

HSGS9937 Total parts: 143 Skill level 3

Plastic Models

AMT® 1/25 Scale 1955 Chevy® Corvette

A sporty, strong 'Vette for the ages.

Chevy introduced its small-block V-8 engine in 1955, and the company made it a priority to feature the engine in that year's Corvette. At first, an automatic Powerglide transmission was the only option for buyers, but a three-speed manual transmission was later introduced. Only 700 1955 models were built, making it a "Holy Grail" find for today's Corvette collectors. Kit features the option to build a stock or custom Corvette, a "dual quad" engine intake option, drag slicks, custom mags, chrome and clear parts, plus exciting vintage packaging.

AMTS0683 Skill level 2

Airfix® 1/72 Scale Junkers Ju 88A-4

The revered Luftwaffe fighter-bomber.

Early Ju 88s were plagued with a plethora of technical problems. However, it soon transformed into an essential part of the Luftwaffe's defense during WWII. The A-4 variant's longer wingspan and more powerful engines helped solve the problems prominent on earlier versions and added to the aircraft's success. By WWII's end, over 16,000 Ju 88s had been produced. Kit features decal markings for 1. Werner Baumbach, I/Kampfgeschwader 30, "Adler Geschwader," Norway, 1941 and 2. Groupe de Bombardement, 1/31 "Aunis," Forces del'Atlantique, Bordeaux-Merigna, France, 1945.

ARXS3007 Total parts: 125 Skill level 2 Length: 10.9 in (278 mm)

Moebius® Models 1/25 Scale 1953 Hudson Hornet

Sleekly designed, with streamlined styling.

Detroit's Hudson Motor Car Company produced the streamlined and low-CG Hornet from 1951-1954. Because of its unique design, the Hornet became a star on the NASCAR® stock car circuit, winning 27 out of 34 Grand National races in 1952. Today, countless car collectors consider the Hornet to be among the most collectible cars of the twentieth century. This kit represents the first time the '53 Hornet has appeared as an injection-molded model! Includes decals.

MOES1200 Total parts: 106

Moebius® Models Space Clipper Orion

A terrific treat for 2001 fans!

If you're a sci-fi fan, surely you'll recognize the Orion III Space Clipper from Stanley Kubrick's groundbreaking 1968 classic *2001: A Space Odyssey*. In one of the film's most memorable scenes, the Orion is shown orbiting Space Station V, as the stirring strains of Strauss' *Blue Danube* blare in the background. The Orion III was also featured on one of the film's many iconic, one-sheet movie posters as well! Kit features brand-new tooling for unsurpassed accuracy, as well as decals and a display stand.

MOES2002 Total parts: 17 Skill level 3

Pegasus Hobbies 1/8 Scale 2005 War of the Worlds Alien Creature

This alien doesn't come in peace...

Written during the late Victorian Era, H.G. Wells' 1898 novel *The War of the Worlds* remains one of the most influential sci-fi tales of all time. In 2005, Steven Spielberg took this classic story of a menacing Martian invasion and turned it into a terrifying, exciting 21st century blockbuster. This detailed kit version of the alien creature is created directly from the 2005 film's 3D computer model. Features include an alternate neck for multiple posing options, multiple limbs, refractive eyes and a display base which includes the film's logo.

ROCKETS: A FUN,

Model rocketry is not only entertaining and enlightening, it's also an integral part of Scouting! Scouts at all levels are involved in numerous science/space projects and activities that include the building and launching of model rockets. If you're a Scout, look into the various Merit Badges that can be earned — then ask your hobby retailer and Scout Pack leader about the Estes rockets that can make earning those badges fun AND educational!

Cub Scouts® and Brownie Scouts®
 Even the youngest Scouts can learn the basics of rocketry, and have fun at the same time! The E2X® (Easy to Assemble) models recommended here can be assembled in about an hour; the Firestreak SST and Dragonite SST rockets take the simplicity even further, with Quick Snap construction that eliminates gluing!

EDUCATOR.com
launch learning fun

For more information, log onto esteseducator.com and click on the "Find Rockets for your Programs" button. There you'll find information about many different youth programs. Contact your local Scouting organization about getting Estes rockets in the hands of the Scouts in your area. Who knows? You or someone you know may be a future astronaut!

Estes Rockets have been used by thousands of Scouts!

PINEWOOD DERBY®

IT'S NOT HAVE A GOOD-LOOKING,

Whether you're all about style or in it to win it, we've got everything you need to create the Pinewood Derby® car of your dreams.

CAR DESIGNERS

A complete kit with paint and decals can get you to the track quicker. Or create a one-of-a-kind model by purchasing paint and decals separately. Choose from over 50 different decals and dry transfers to get the detail you want without intricate painting. There are even custom body skins that you can apply!

TOO LATE TO GET RACING!

FAST-RUNNING CAR FOR PINEWOOD DERBY® COMPETITION!

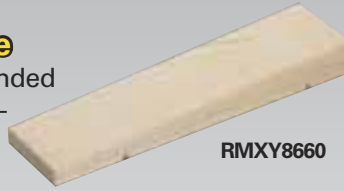

SPEED DEMONS

To take the checkered flag, you want to minimize friction and maximize momentum. Here are the five keys to getting the top performance out of your car:

Key #1 – Aerodynamic Shape

Design your ride with a low profile and rounded or tapered edges. Check for unfilled holes — they can catch air and slow you down.
RMXY8660 Wedge Basic Racer w/Wheels & Axles
RMXY9632 Basic Racer Kit

Key #2 – Weight Distribution

Weight equals momentum, and it's important that you position that weight near the rear of the car.
RMXY9601 Round Chassis Weight
RMXY9602 Taper Chassis Weight
RMXY9603 Stick On Chassis Weight

Key #3 – Wheel & Axle Preparation

The Hub Tool helps you put a smooth, uniform bevel on the hub of each wheel, combating frictional loss. Official BSA® race-legal wheels come in five different colors.
RMXY8666 Hub Tool
RMXY9608 Official BSA Wheel & Axle Set-Black
RMXY9613 Wheel Truing Mandrel Set

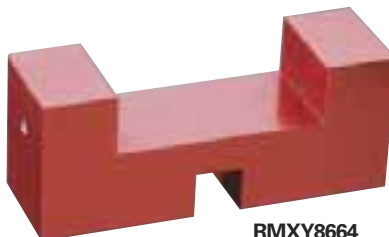

Key #4 – Lubrication

Keeping your car rolling free and easy is very important, and graphite is the most commonly used lubricant in pine car racing.
RMXY9614 Graphite Powder

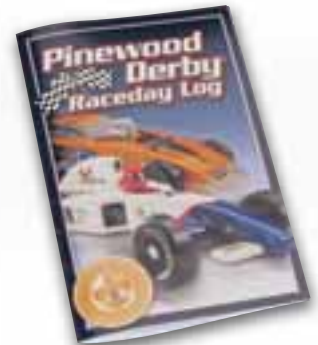

Key #5 – Alignment

For a car to go fast it needs to go straight, and the Axle Alignment Tool makes it easy to achieve accurate wheel alignment.
RMXY8664 Axle Alignment Tool

Racers in the know go for the all-in-one Speed Kit!

This handy Tuning Set has everything you need to get the best possible performance out of your Pinewood Derby® racer: wheel truing mandrel, sandpaper, pumice powder, graphite powder, Pinewood Derby® Raceday Log Tips and Tricks book and instruction sheet.
